

WE ARE PROBLEM SOLVERS

1 Health Source, LLC has created an innovative and proprietary online platform specifically designed to streamline the prescription ordering process for Clinicians who serve cash-pay Patients.

This cutting-edge solution enables healthcare providers to directly order prescription medications for their Patients at significantly reduced prices — approximately 40% lower than what Patients typically pay out-of-pocket through traditional pharmacy channels. In addition to the substantial cost savings, the platform offers the added benefit of home delivery, ensuring that medications are conveniently shipped right to the Patient's doorstep.

This not only enhances access to essential treatments but also improves overall Patient satisfaction and adherence to therapy by eliminating common barriers such as high costs and transportation challenges.

"We cannot solve our problems with the same thinking we used when we created them."

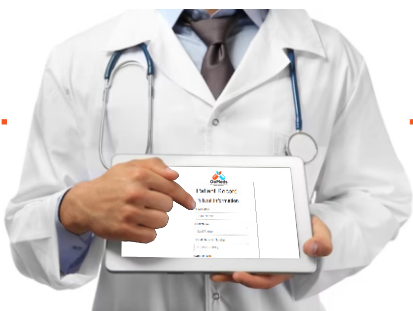

— Albert Einstein

At the time of each order the patient will pay the Clinician's Office at checkout time for their visit including prescription costs. A Daily Order Summary is emailed to the Clinician who then submits one ACH payment to GoMeds for the cost of all of the prescriptions written that day.

Once payment is received the dispensing Pharmacy will process the order and send the tracking information to the patient.

Two-months prescriptions are the most-cost effective way to ship their prescriptions.
