

RideNow Installation Case Study

Overview:

The Purpose of the entire project was to increase light levels 25%+ inside to HIGHLIGHT PRODUCT FOR CUSTOMERS, the Plan was using Titan LED US Made products that will Increase FT Candles by 50% thus overdelivering light levels. What we replaced inside were many 6 tube T5 – 54W fluorescent, rated at 10K hours with our T5 20W US Made 155,000 Rated hour product & 12 Year warranty.

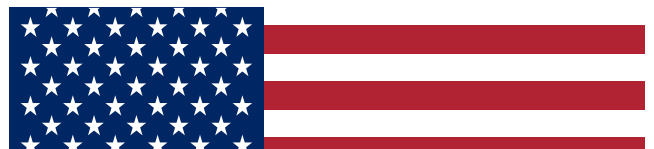

Results:

Titan LED installed new LED lighting at both internal and external locations of the retail facility. In over 14 locations where foot candle readings were documented, we were able to record substantial differences in each location. The goal was to increase by 50%, and with the average foot candle readings jumping from 22 to 61, we performed at 177% Increase, far exceeding all expectations.

177% **increase** in average foot candle readings, from a beginning average of 22 to 61!

Titan LED Inc. is an American-Owned company, manufactured and operated in Phoenix, AZ.
