

IMAGINE: TURNKEY MAINTENANCE FREE LIGHTING, FOREVER!

PROUDLY DESIGNED, ENGINEERED AND MANUFACTURED IN AMERICA

- Lower Operating Expense
- High Definition Light Quality
- Free Up Working Capital
- No Budget Required
- Improve Worker Productivity
- Improve Building Value
- Better Customer Experience
- Lower HVAC Cooling Cost

In Reality, Self-service means multiple lights out

- ✗ Multiple lights out create low light levels and a poor work environment
- ✗ Hiring electricians to combat these issues means high cost.
- ✗ No matter how you address it, lighting and ballast maintenance is a waste of time and money.

The problem is, how to create a workplace where your customers and employees see your business in the best light available...

The Solution is Titan360

Titan360 is a program that does not require an upfront capital investment. It allows your current electric bill to fund the Titan360 by reducing your wattage and is treated as an operating expense much like you're doing currently with your electric bill without all the benefits of the Titan360.

You receive a service that provides state-of-the-art American Made LED Lighting, installed, maintained, and 100% cared for by Titan LED. You will never again have to worry about burnt-out bulbs or ballast, climbing ladders or hiring offsite electricians to use bucket trucks or scissor lifts all while Increasing Your Bottom Line P & L Statement with the Titan360 program.

***In most cases
you spend less
than what
you're already
paying!***

How it Works:

1 Audit Facility & Customer Review

Titan Representative Schedules On-Site Audit and confirms Your Order.

2 Titan360 Reviews

Titan Project Management reviews complete order requirements

3 Certified Installation

Installation is scheduled and performed by Certified Electrician.

4 Customer Install Approval

Customer agrees and confirms installation.

5 Titan360 Service begins

Customer enjoys Brilliant Lighting, Energy Savings and Free Maintenance.

Our Mission:

Titan LED's Mission is to become a recognized leader in LED lighting solutions while providing revolutionary energy savings throughout North America. We seek to be uncompromised in quality and service, distributing innovative and cutting-edge LED products for commercial and residential applications.

Our Capabilities:

Titan LED is an Inc. 500 manufacturer and OEM specializing in energy-efficient, clean tech LED lighting solutions. We offer a variety of cutting-edge, proprietary, American made products custom designed to retrofit into existing infrastructures for a complete turn-key solution. Based in Phoenix, AZ, we proudly design, build, populate, package, and assemble our products in the U.S.A. Titan LED's commitment to excellence is displayed through quality product development and innovative technologies that have solidified Titan LED as a world-class leader.

ACC Technology:

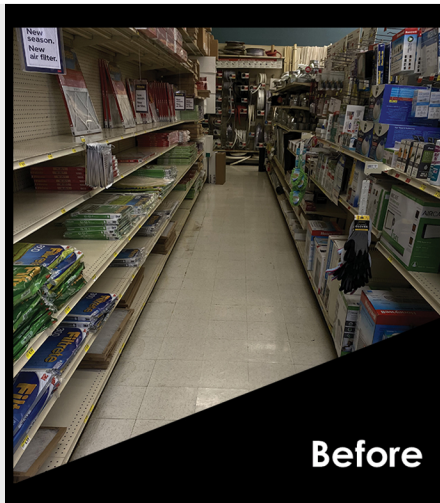

Titan LED's Patented ACC Technology is just one of the advantages of setting Titan LED High Bays, Shoeboxes, Wall Packs, and Fuel Canopy lights far apart from the competition. It delivers unprecedented Low Temperatures, which results in a truly long life.

Why Titan LED?
