Marcus Neuroscience Institute Knock Out Stroke and Emergency Medical Services Symposium 6.0

7.25 Cat. 1

FREE Virtual Symposium | Zoom
Thursday, August 7, 2025

[Enroll Today](#)

The **Knock Out Stroke and Emergency Medical Services Virtual Symposium** will provide attendees with relevant information regarding new developments in and approaches to the management of stroke events. Clinicians will benefit from in-depth reviews of the latest science and cutting-edge advances in the treatment of venous strokes, embolization with subdural hematomas, seizures, aphasia and thrombectomies. Please join us for this free full-day symposium.

Learning Objectives

Upon completion of this symposium, participants should be better able to:

- Discuss pre-hospital assessment tools to identify stroke and large vessel obstruction.
- Provide updated information from the current guidelines on women and stroke.
- Describe unusual presentations and posterior stroke symptoms for earlier recognition of strokes.
- Discuss use of the family hotline cards and provide data for improved time metrics.

Who Should Attend

Primary care physicians, family physicians, general internists, emergency medicine physicians, cardiologists, hospitalists, advanced practice providers, nurses, pharmacists, emergency medical technicians, dietitians and respiratory therapists.
