Solatube® Whole House Fans

Engineered Performance Series (EPS)

Instantly cool your home

Dramatically reduce A/C bills

EC motor with 7 speeds for comfort and efficiency

Ultra-quiet operation

Removes odors and dirty air

Eliminates stale air in the winter months

How it works.

The Solatube EPS Whole House Fans will pull the cool, fresh outside air into your living spaces through your windows, and push hot, stale indoor air through your attic and out the vents. This helps cool the home and attic by up to 30 degrees, and sometimes more, allowing them to stay much cooler the following day (the principle of Thermal Mass Cooling).

Cooler and fresher. All day. All summer.

During the warmer months, using the Solatube Whole House Fan not only cools the air in your house, but also the structure and contents. This helps cool the home and attic by up to 30 degrees, and sometimes more, allowing the space to stay much cooler the following day (the principle of Thermal Mass Cooling). Overall costs to keep the home cool are dramatically reduced, especially as compared to air conditioning.

Cleaner and healthier. In minutes. All winter.

During the colder months, indoor air can become stale, trapping impurities and germs. Fortunately, Solatube's Whole House Fan offers an easy solution, rapidly expelling this stagnant air and replacing it with fresh, clean air. With Solatube's Whole House Fan, you and your family can breathe easier, stay healthier, and feel more comfortable all season long.

Engineered to last. Engineered to blast.

- 1 EC brushless motor with 7 variable speeds for long-lasting strength and energy-efficient operation
- 2 Soft Start technology saves electricity and extends motor life
- 3 Jet Blade design dramatically increases power and decreases noise/vibration
- 4 Insulated ducting quietly cools
- 5 R6 damper door provides superior insulation
- 6 No visible grille fasteners provide a clean and modern look
- 7 Easily removable & dishwasher-safe intake grille cleans quickly and easily
- 8 Innovative HushMount™ 2 Patented Technology provides quiet operation
- 9 Comfort Control Remote allows you to customize your airflow at the touch of a button

Engineered performance solutions for your home.

We have four EPS models that can be used alone or combined to cover all the zones in your house. Our Certified Installation Consultants can help you choose the right configuration with a free in-home consultation, and absolutely no obligation to purchase.

	Recommended Model	EPS Zone	EPS Plus	EPS Ultra	EPS Extreme
