Lived Vision

Aluminum-wood window AHF105 EF S Modern

 Designed in
Germany

Flush design

- noble wood on the inside, sturdy aluminum shell on the outside
- unified framework, no interfering offset
- sustainable and innovative
- clear lines, minimal view widths, maximum light incidence
- meets the highest requirements for safety, thermal and sound insulation

material outside	aluminum shell, powder-coated, highly weatherproof
material inside	wood, flapping sash
kinds of wood	pine, meranti, spruce, larch, oak
gasket system	three circumferential gaskets
hinge system	turn-tilt, concealed hinges
building depth (frame/sash)	105 / 105 mm
max. glazing thickness	48 mm, fixed glazing 52 mm
view width	115 mm
thermal insulation	up to $U_w 0,76 \text{ W/m}^2\text{K}$ (spruce)
noise protection	up to class 4
burgler protection	up to RC 2
air permeability	class 3
driving rain protection	class 7A
color choice	according to Kneer-Süd color chart and each RAL-color
