

SHERBURN 42, FIRETHORN

Project Details

Type of Work Undertaken:

Earthworks, Groundworks, Landscape, Sub-base

Client: McLaren Construction Group

Value: £1.2 Million

Form of Contract: JCT

Duration: 35 Weeks

Project Overview:

Site owners Cain International embarked on their next journey in which they appointed McLaren Construction Group to build and deliver a 660,000 sq ft Grade A Logistics Unit located in Sherburn in Elmet.

Alwoodley Civils Ltd were brought in by McLaren Construction Group to internally sub-base four logistic units using our 2D grader system. During our time indoors, it was brought to our attention by the clients, that the external yards and roads also needed prepping which lead us onto a longer stay on site utilising our 3D grading system. Once all works were complete, a new scope of works arose which secured us the landscaping throughout the site. From grasscrete roads, to top soiled embankments, to pond shaping we worked alongside McLaren to deliver the best results possible to the highest of standards.
