# Company Overview

**Quality Trust Sand Washing L.L.C** started in an effort to address the growing demand for high-quality, sustainable construction material products in UAE. With rapid changes in the construction industry environment, changes in the ways of supplying of the materials are also required. Construction materials nowadays should use the highest and latest technologies in their development in order to be sustainable, low-cost and efficient. We have been involved in providing innovative and efficient solutions for beach reclamation and beach profiling works for various hotels and resorts in the UAE.

**QTS** have been successful in supplying to a variety of small and large-scale projects, including some of the most iconic constructions in UAE that regionally and globally are recognized as the gold standard of building development in terms of architectural design, engineering and quality.

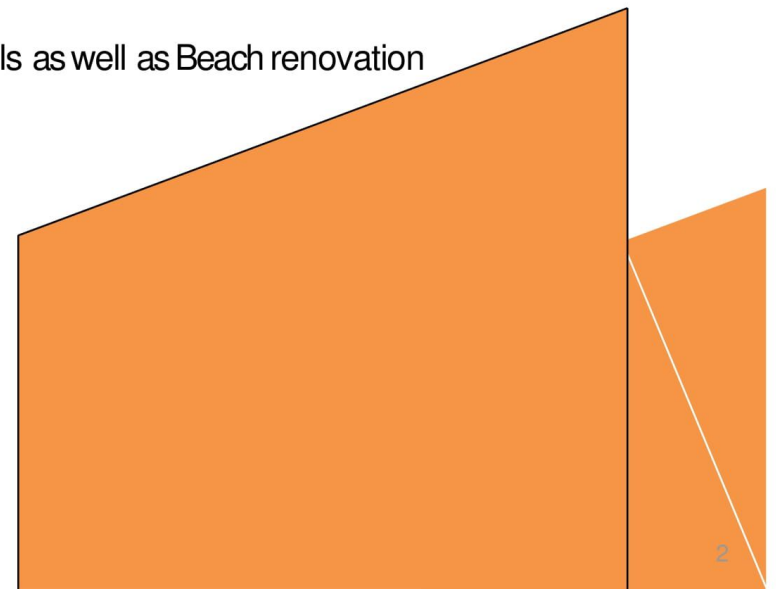

## Mission

Our mission is to provide the highest quality of services and products with the most competitive prices to our customers. Offering world class customer support and using the fastest and most efficient methods of supply chain solutions to bring products to the hands of our customers.

The core business of **QTS** focuses on sourcing and supplying sand & gravel materials as well as Beach renovation services

## Vision

Our vision is to become one of the leading suppliers of building material products in the region. Starting with Ras Al Khaimah and UAE as a home market and expanding rapidly to the other MENA countries in the following years.

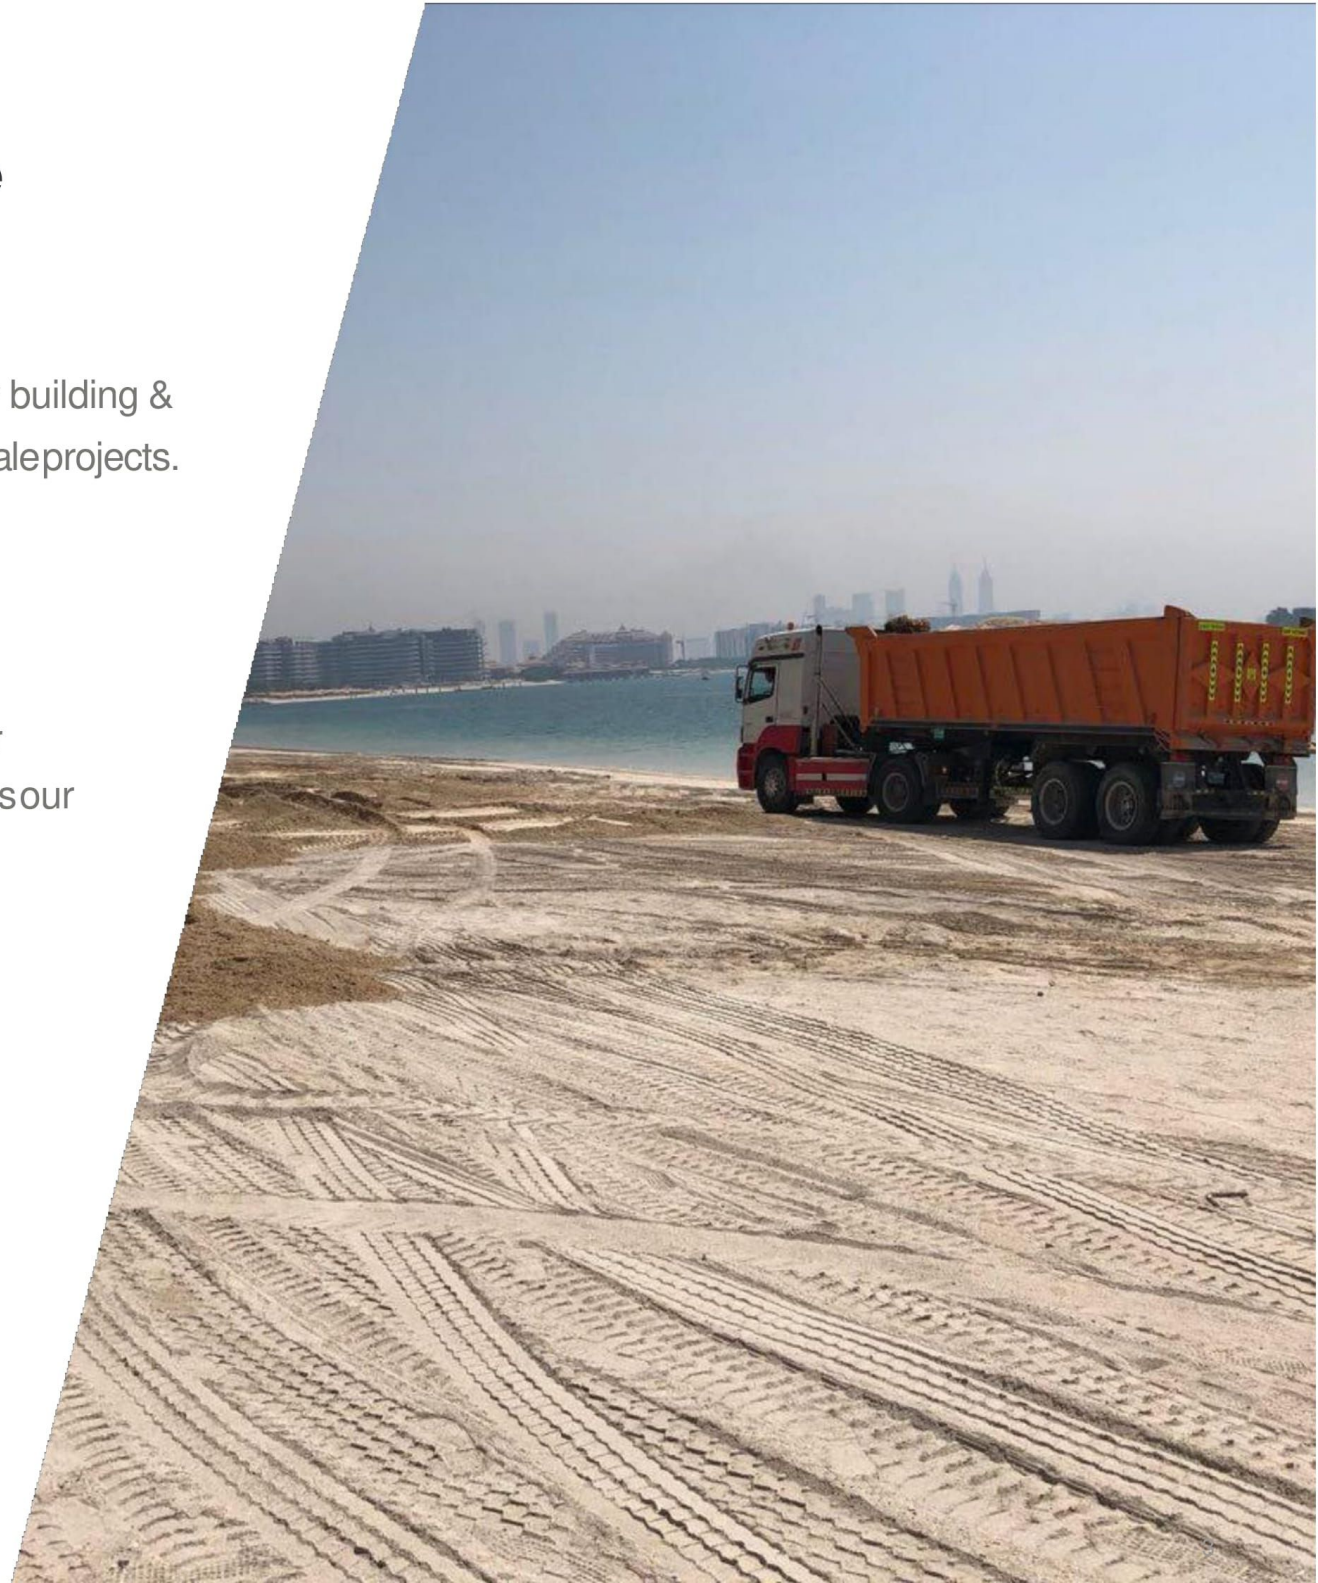

# Company Profile

**QTS** is specialized in supplying high quality building & construction materials for small and large-scale projects.

**Our team** Consists of highly experienced individuals who are determined to deliver our products and services in a way that represents our company culture and values

**Our Products** are locally sourced, environmentally friendly, and conform with highest levels of standards

# White Sand

Excavation  
Washing  
Supply  
Transport

**Quality Trust Sand Washing L.L.C** is one of the market leaders in supplying beach sand also known as “White Sand” or “Washed Sand” in the UAE.

We have full control over all aspects of the supply chain. From excavation to filtration, washing, stocking, supplying and transportation.

**QTS** ensures unmatched quality, supplying capacity and pricing for its customers.

We have been able to supply washed sand to projects of various sizes, from small children play area in a private villa, to a large hotel & resort beach profiling and even an international beach soccer tournament.

## Notable Projects:

- FIFA Huawei International Beach Soccer Competition 2017 & 2018
- Sofitel Retreat Hotel by M Gallery – Dubai Palm Jumeirah
- Intercontinental Hotel Al Aqah – Fujairah
- W Hotel the Palm – Dubai
- Emerald Kempinski Palace – Palm Jumeirah, Dubai
- Sweden Island – The World Islands – Heart of Europe Project

## **Red Dune Sand** Sweet soil

**QTS** supplies & Transports high quality agriculture sand also known as red sand in bulk quantities

## **Black Sand**

**QTS** supplies & Transports Washed black sand in Bulk quantities

## **Backfilling Sand**

We excavate, supply & transport Backfilling sand also known as “Dafan” in bulk quantities

**Black Sand  
Red dune /  
Sweet Sand  
Filling Sand**

Our range of sands are construction grade fully washed and are offered in bulk quantities starting from 3 cubic meters. **QTS** has a large supplying capacity on all range of sands.

# Crushed Aggregates

Supply | Transport

**Aggregate 3/4**

**Aggregate 3/4 = 20 MM - 30 MM**

Aggregate 3/4 is most used in road building, landfilling as well as decorating works in landscaping projects.

**Aggregate 3/8**

**Aggregate 3/8 = 10 MM - 20 MM**

Medium sized aggregate which can be used either alone or as a mix with either aggregate 3/4 or aggregate 3/16 in order to balance the average size of those aggregates.

**Aggregate 3/16**

**Aggregate 3/16 = 05 MM - 10 MM**

Aggregate 3/16It is also known as the interlock sand because it is used as the bedding layer before laying on the interlocks.

# Road Base Material

Supply | Transport

**QTS** supplies Road Base material made from crushed aggregate sizes of zero to 50MM mixed with our own high-quality black sand. The result is a high-quality grade 'A' Road base material that is suitable for every road building and land fill compaction works.

We have the capability to handle more than 10000 cubic meters of Road Base daily in our Al Jazeera Al Hamrah area plant in RAK.

**QTS** also offers leveling, grading, watering & compaction services for the supplied road base material in UAE

## Notable Projects:

- Dubai Parks & Resorts – Jebel Ali
- Dubai Ship Building Company HQ – Dubai Maritime City
- Mohammed Bin Rashid Al Maktoum Solar Park DEWA – Dubai
- Huawei International Beach Soccer 2017 Competition Parking Area – Dubai
- Damac Hills – Dubai
- Sharjah University campus - Sharjah
- Dubai Expo 2020 main dome – Assembly surface treatment

# Beach Profiling & Nourishment

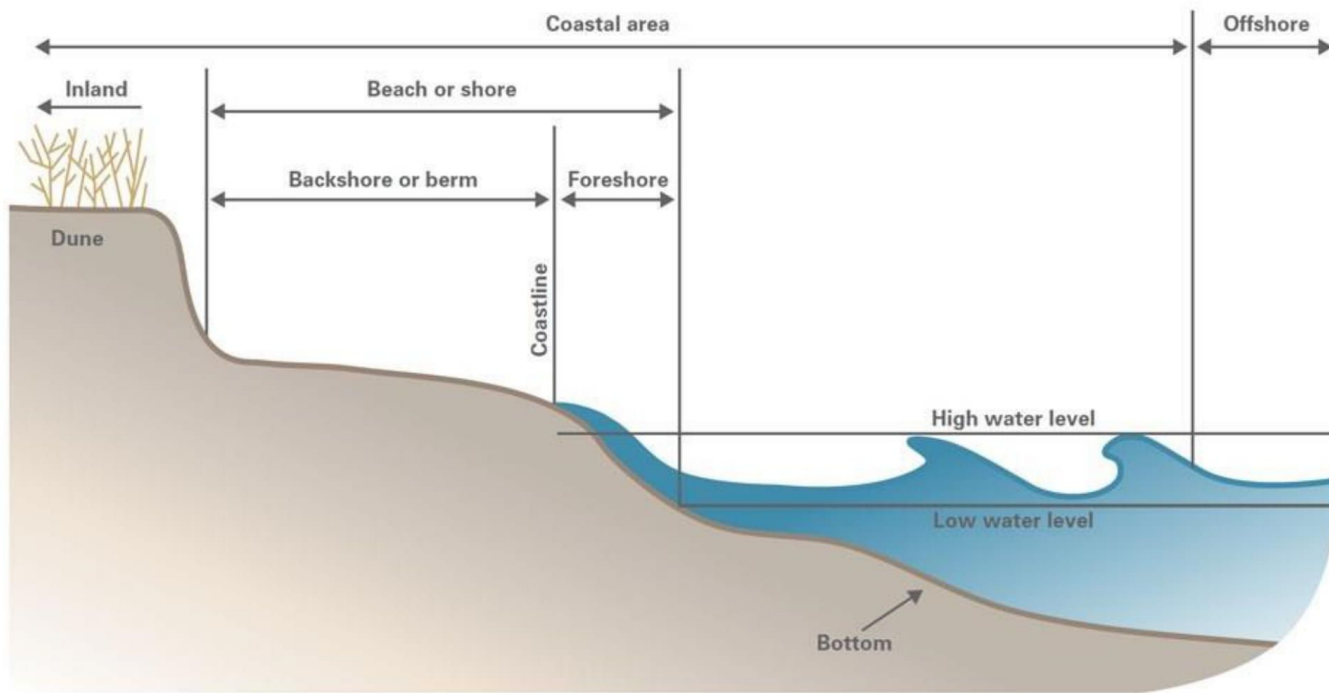

Beach Profiling and beach nourishment works are one of the most effective means of maintaining a high-quality beach. In places where a complete redesign and development of the beach is not necessary, beach profiling and nourishment works help to renew the existing sand, widen the beach and change the angle of attack of the sea tides in order reduce the sand loss.

# Complete Beach Profiling

**Beach profiling** is an effective way to widen the beach, reclaim back the lost beach space due to erosion and sand loss and improve the overall beach design in order to have more usable beach space.

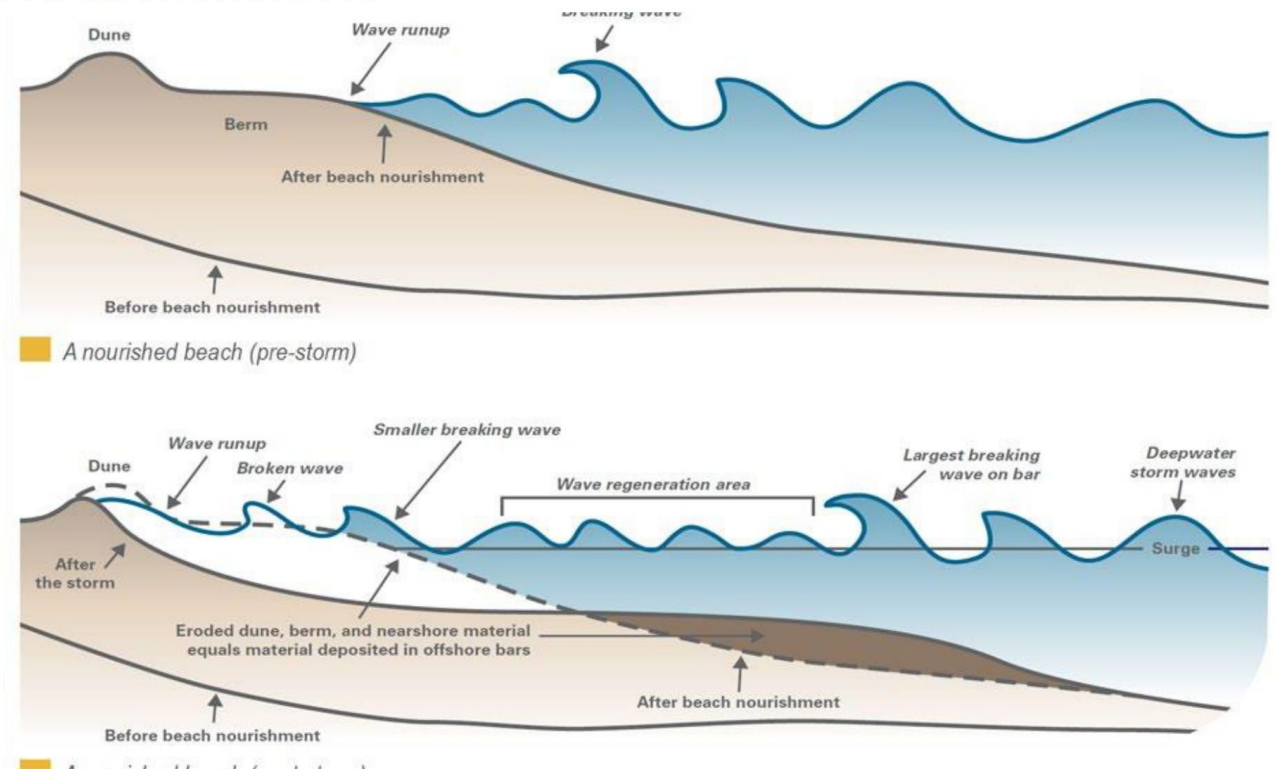

Coastal beaches function as a system. The beach not only includes the dunes and berm, or the dry part of the beach, but also the wet part of the beach that slopes underwater.

Beach Profiling work requires a **careful study** of the beach site location, its seasonal tide and wind conditions, historic records of sand erosion and slope changes. After conducting a study of the above items, we proceed with measurements and **slope design calculations**. The main stages of beach profiling work are as below:

- Site Survey
- Beach area slopedesign
- Calculations of the needed sand quantity
- Mobilizing the heavy equipment
- Removing/shifting the old sand
- Supply of the fresh new high-quality beach sand
- Leveling/compaction
- final tests

# Beach Nourishment

With our vast experience in **beach nourishment** works, we can offer fast, **cost-effective** solutions for replacing the old sand with high quality filtered and **double washed fine beach sand** at your premises.

We understand the value of your beach and we are very flexible in terms of capability, equipment and working hours in order to ensure minimum inconvenience to your guests during the course of the nourishment works.

Our goal is to enable you to offer your guests a 5-star beach experience and increase guest satisfaction.

# Transport Fleet

For fast & Effective Delivery

**3 CBM Tipper Pickup**

Small sized delivery vehicle suitable for total order quantities smaller than 15CBM. Each trip can transport 3 Cubic Meters / 4 tons of sand & aggregates

**20 CBM Tipper Truck**

Medium Sized delivery vehicle also known as 6-wheeler truck. The most used vehicle in our fleet. Can load up to 20 Cubic Meters / 30 Tons of aggregate and sand material

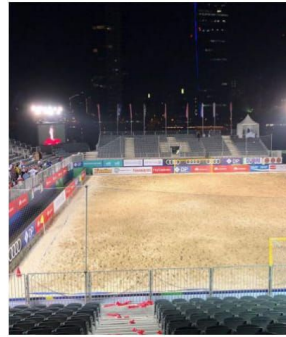

**35/45 CBM Tipper Trailer**

Large sized delivery vehicles. The largest type of vehicle in our fleet can load up to 45 Cubic meters / 75 Tons of sand & aggregate material
