

Your Partner For Success

ADDRESSING THE NEEDS OF CUSTOM BUILDERS AS WELL AS TRACK HOME & MULTI-FAMILY DEVELOPERS.

Imagine how delighted your customers will be when you deliver a home that doesn't need any tweaking or touch-ups. They could use every bit of their home as soon as they move in and you wouldn't have to invest any more money or labor into it until it needed warranty repairs. Come to think of it, you'd probably have

fewer of those as well.

At Homefield Handyman Services we find that our builder clients have fewer headaches when they do what they do best, which is build houses and when they leave the customer service and warranty work to us, *cause that's what we do best!*

Please visit our web-site at HomefieldHandyman.com to learn more about our services or simply call us and we'll be happy to meet in person and see how we can help you deliver "*models of perfection*" to your customers.

Enthusiastically,

Michael Krausman
