

# Maor TechOps Technical Consulting Offerings

## *Where clarity meets capability*

With 20 years across construction technology, enterprise systems, digital adoption, and cross-departmental alignment, I help individuals and organizations turn tangled operations into streamlined, scalable ecosystems. My work bridges executives, field teams, and technical stakeholders—translating needs, eliminating friction, and building systems that actually work for the people who use them. Whether you're a solo professional, a growing small business, or a complex enterprise, my approach adapts to your scale while preserving the same foundation: clarity, efficiency, and sustainable growth.

## Three-Tier Consultation Packages

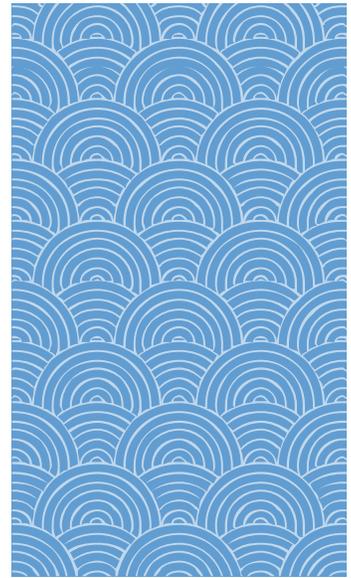

### **Tier 1: Individual / Professional Support**

*For consultants, freelancers, and career professionals who need structure, clarity, and technical polish.*

#### **What's Included:**

Website design and workspace setup for solo operations  
- Systems & workflow assessment (current tools, gaps, opportunities)  
- Personal productivity ecosystem setup (M365, cloud storage, automation basics)  
- Resume, portfolio, and professional branding alignment  
- 1:1 coaching on digital organization, adoption, and long-term accountability habits.

**Ideal For Professionals who want to operate like a small business—without the overhead.**

## **Tier 2: Small Business / Team Enablement**

*For organizations with 2–50 employees who need scalable systems, better communication, and operational alignment.*

### **What's Included**

Full systems and workflow analysis across departments - Intranet site buildout or modernization (document management, permissions, structure) - Power Platform automations for repetitive tasks - SOP and process documentation with cross-team translation - Team adoption training and onboarding materials - Light reporting dashboards for visibility and decision-making - Optional: branding and communication refinement for internal/external use.

**Ideal For Growing companies ready to replace patchwork tools with a cohesive operational ecosystem.**

## **Tier 3: Enterprise / Technical Program Leadership**

*For large organizations needing strategic oversight, modernization, and cross-departmental alignment.*

### **What's Included:**

Enterprise-level systems assessment and roadmap creation - Digital adoption strategy for large, distributed teams - SharePoint intranet modernization and governance frameworks - Power Platform solution design, automation pipelines, and lifecycle management - Executive-level reporting ecosystems and KPI alignment - Cross-functional program management (IT, field ops, HR, finance, PMO) - Change management planning and communication strategy - Long-term partnership options for continuous improvement.

**Ideal For Enterprises seeking a leader who can translate between departments, unify systems, and drive sustainable modernization.**
