

a galaxy of
stars

a galaxy of stars

Some stars burn bright in solo spots
Like diamond dots on velvet.
Some gather and gleam behind the scene -
The sky's own tinsel blanket.

Alone and bold; in glittering groups;
A thousand trillion clusters;
The cosmos has all kinds of stars,
Each adding to the luster.

Would a star wish to shine
The way another glows?
Could it be they don't see
A sparkle of their own?

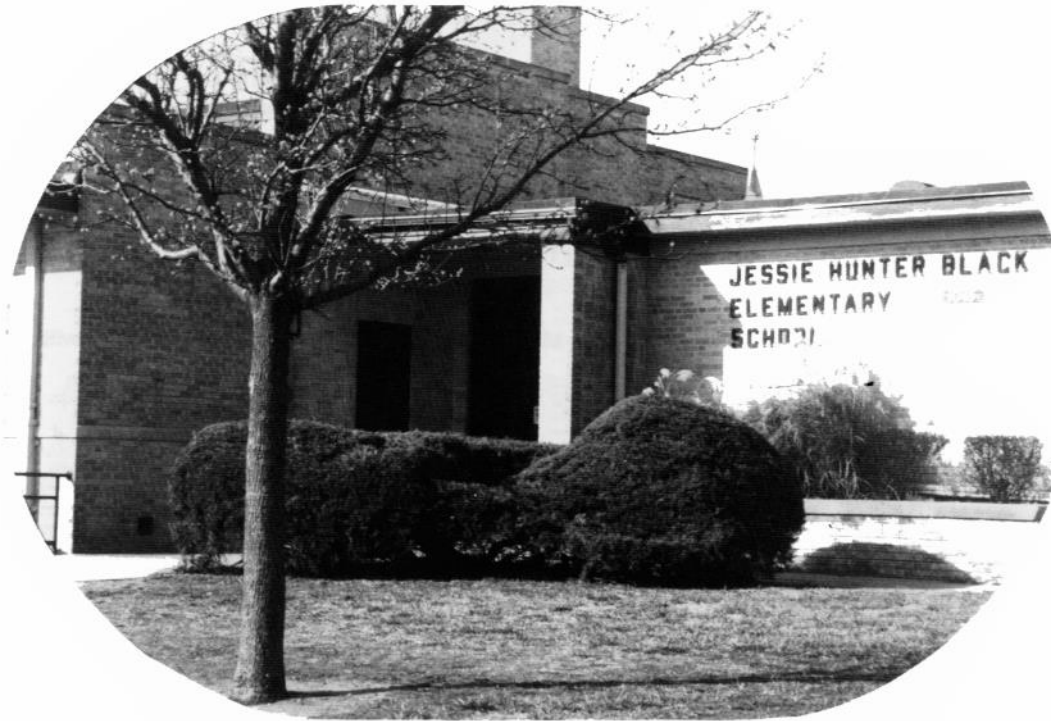

In the universe of galaxies
Expanding throughout time,
There are no stars who don't give light;
There are lots of ways to shine.

1999 - 2000

The mission of Black Traditional Magnet Elementary School in partnership with parents and community is to provide students an opportunity to achieve and to be challenged in accordance with their ability in a safe, structured, disciplined, equitable environment, in order to prepare them for a constantly changing society.

Phylis A. Brady - Principal

This has been a very busy year...

In September our school was assigned full accreditation by the Kansas State Board of Education based upon our successful completion of our first four-year cycle of the Quality Performance Accreditation process. Congratulations go to staff, students, and our supportive parents who worked very hard during the last four years to improve our school!

New enrollment forms, new student progress reports, new lunch accounting system, new attendance computer programs, and other new computer systems for the district have provided challenges for all this year. The patience of staff and parents has been great as we have worked together to implement these new systems.

Time spent this year by staff, parents, and community members on identifying our building facility needs and developing solutions to our problems has been much appreciated. We are fortunate to have the strong support of our PTO and Site Council.

While all of the above activities were going on, teachers were working with students and students were learning. Working to meet grade level standards, taking MAT 7 tests, preparing for district benchmark assessments, taking state assessments - all made for a very busy academic year. The work has not been easy, but we have an excellent staff and student body!

As we continue our mission for Black Traditional Magnet, I am pleased to be able to work with such fine staff, students, and families.

We have learned so much this year. We are reading so well now. Most of us have mastered all four of our math time tests. We have also worked hard to become good citizens! I wish this class a super second grade year!

This first grade class has been one of the high points in my teaching career. The students are anxious to learn and work hard, although, learning to read, spell and do computation has not been easy for everyone. They are helpful and have a great sense of humor. I look forward to being with them each day. I really appreciate the level of parent support these students and myself have received.

Mrs. LaForge

My class has been busy this year learning to read, write their own stories, doing numbers and telling time. They have made and enjoyed new friends and learned how to take care of animals and the earth. Reading is their favorite activity. They also enjoy the activities of art, physical ed, music, health and science. They have had fun learning study trips. I wish for these students a happy and successful life.

Ms. Auchterlonie

Congratulations on a very good year. Everyone has worked hard and made excellent progress. You will long remember your experiences in Fifth Grade. We ate at least one of our science experiments, took turns learning from a wheelchair during the disabilities unit, and wrote wonderful stories. Take your new skills on to Sixth Grade.
