“Specialized Services for Children with Special Needs”

“Provider of Specialized Services for Infants and Toddlers with Developmental Delays, since 1995”

CurtisCARE

Offers a continuum of services for children with developmental delays and/or disabilities. The program promotes early learning thru active participation that is implemented by our Early Childhood Interventionist in accordance with (HELP) Hawaii Early Learning Program and childrens Individualized Play Plan. Each session is recorded in written notes to measures progress and delivered in quarterly and annual reports. Prescribed visits are

authorized by the regional center and lasts for one hour. Family engagement is a key factor to promote growth and understanding about special needs. It helps the family to perform as a unit and to practice behavioral interventions.

Each CurtisCARE Early Stimulation Home Based Program service is individually designated to meet the needs and goals for each particular child. The Interventionist works as a team partner to guide and teach the family the primary domains of learning, socialization and physical functioning. Our Multi Disciplinary Team includes Speech & Language Pathologists and Occupational Therapists who are available by regional center authorizations.

LucinaM@CurtisCARE.org

Home-Base Program (HW0757)

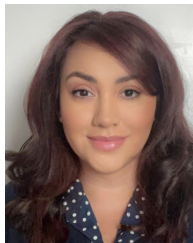

The CurtisCARE Home-Base Program team serves children ages birth to three (3) years of age. Children are provided intervention services as prescribed by the regional center for implementation by our Certified Early Intervention Specialists who are experienced implementors of age appropriate practices for children with developmental disabilities.

We communicate in both English and Spanish and we represent the community that we serve
