Veterinary Referral Form

This form endures patient safety and facilitates collaboration between our organization and the veterinarian. Massage therapy and bodywork are valuable tools for all animals, providing relief from fatigued muscles and aiding in the prevention of future injuries and damage. Conditions such as acute muscle injury are benefited by massage therapy in addition to medical therapy. Massage therapy and bodywork do not replace veterinary care. Danielle Crane is not qualified to diagnose conditions or prescribe medications.

By signing this form, you acknowledge that the animal is in good health and capable of benefiting from massage and bodywork to enhance their quality of life.

I am always available to discuss veterinary consultations via phone or email to collaborate on a plan to ensure the pet's optimal physical condition.

Patient Name: _____ Date: _____

Owner Name: _____
