SHAPED BY DESIGN.
DEFINED BY DETAIL.

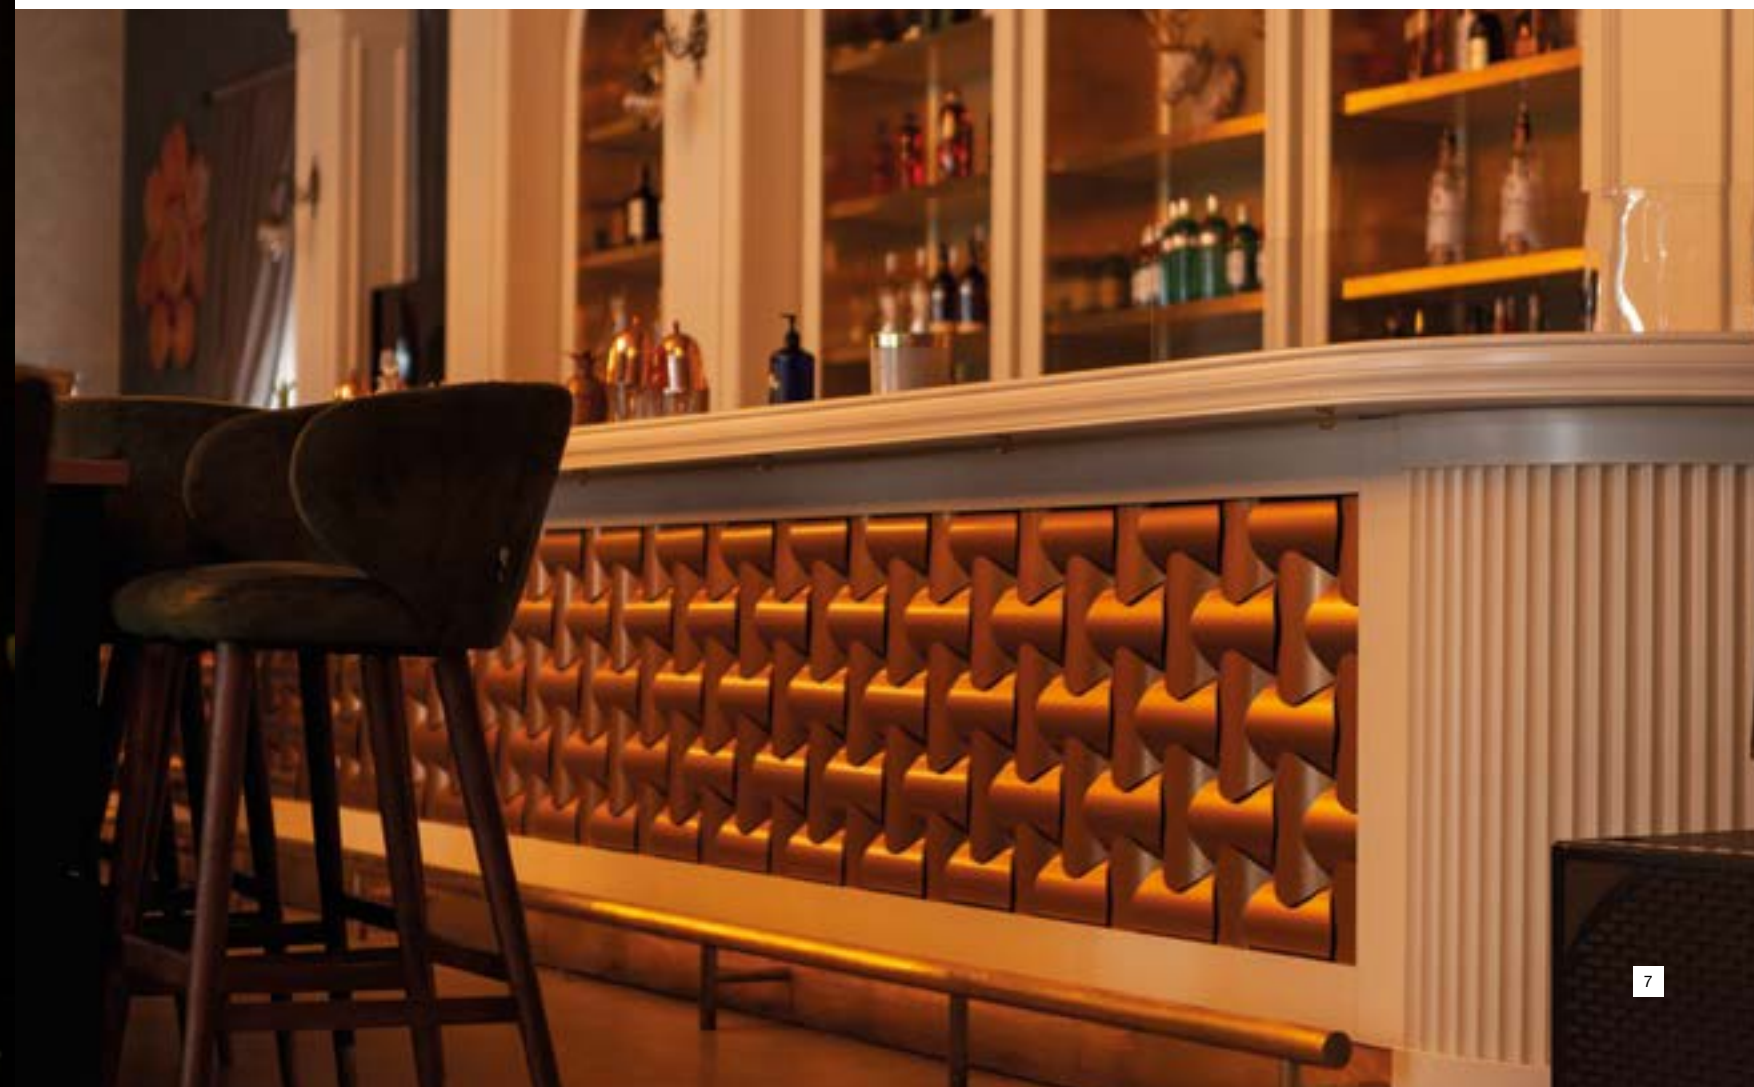

LUT Cube wall systems bring depth,
texture and architectural character
to residential, commercial and
hospitality spaces.

Spline

“Spline” has 3d knitting
visuality which is inspired by the
moving of splay lines, its elegant,
with a simple design.

11

NORM

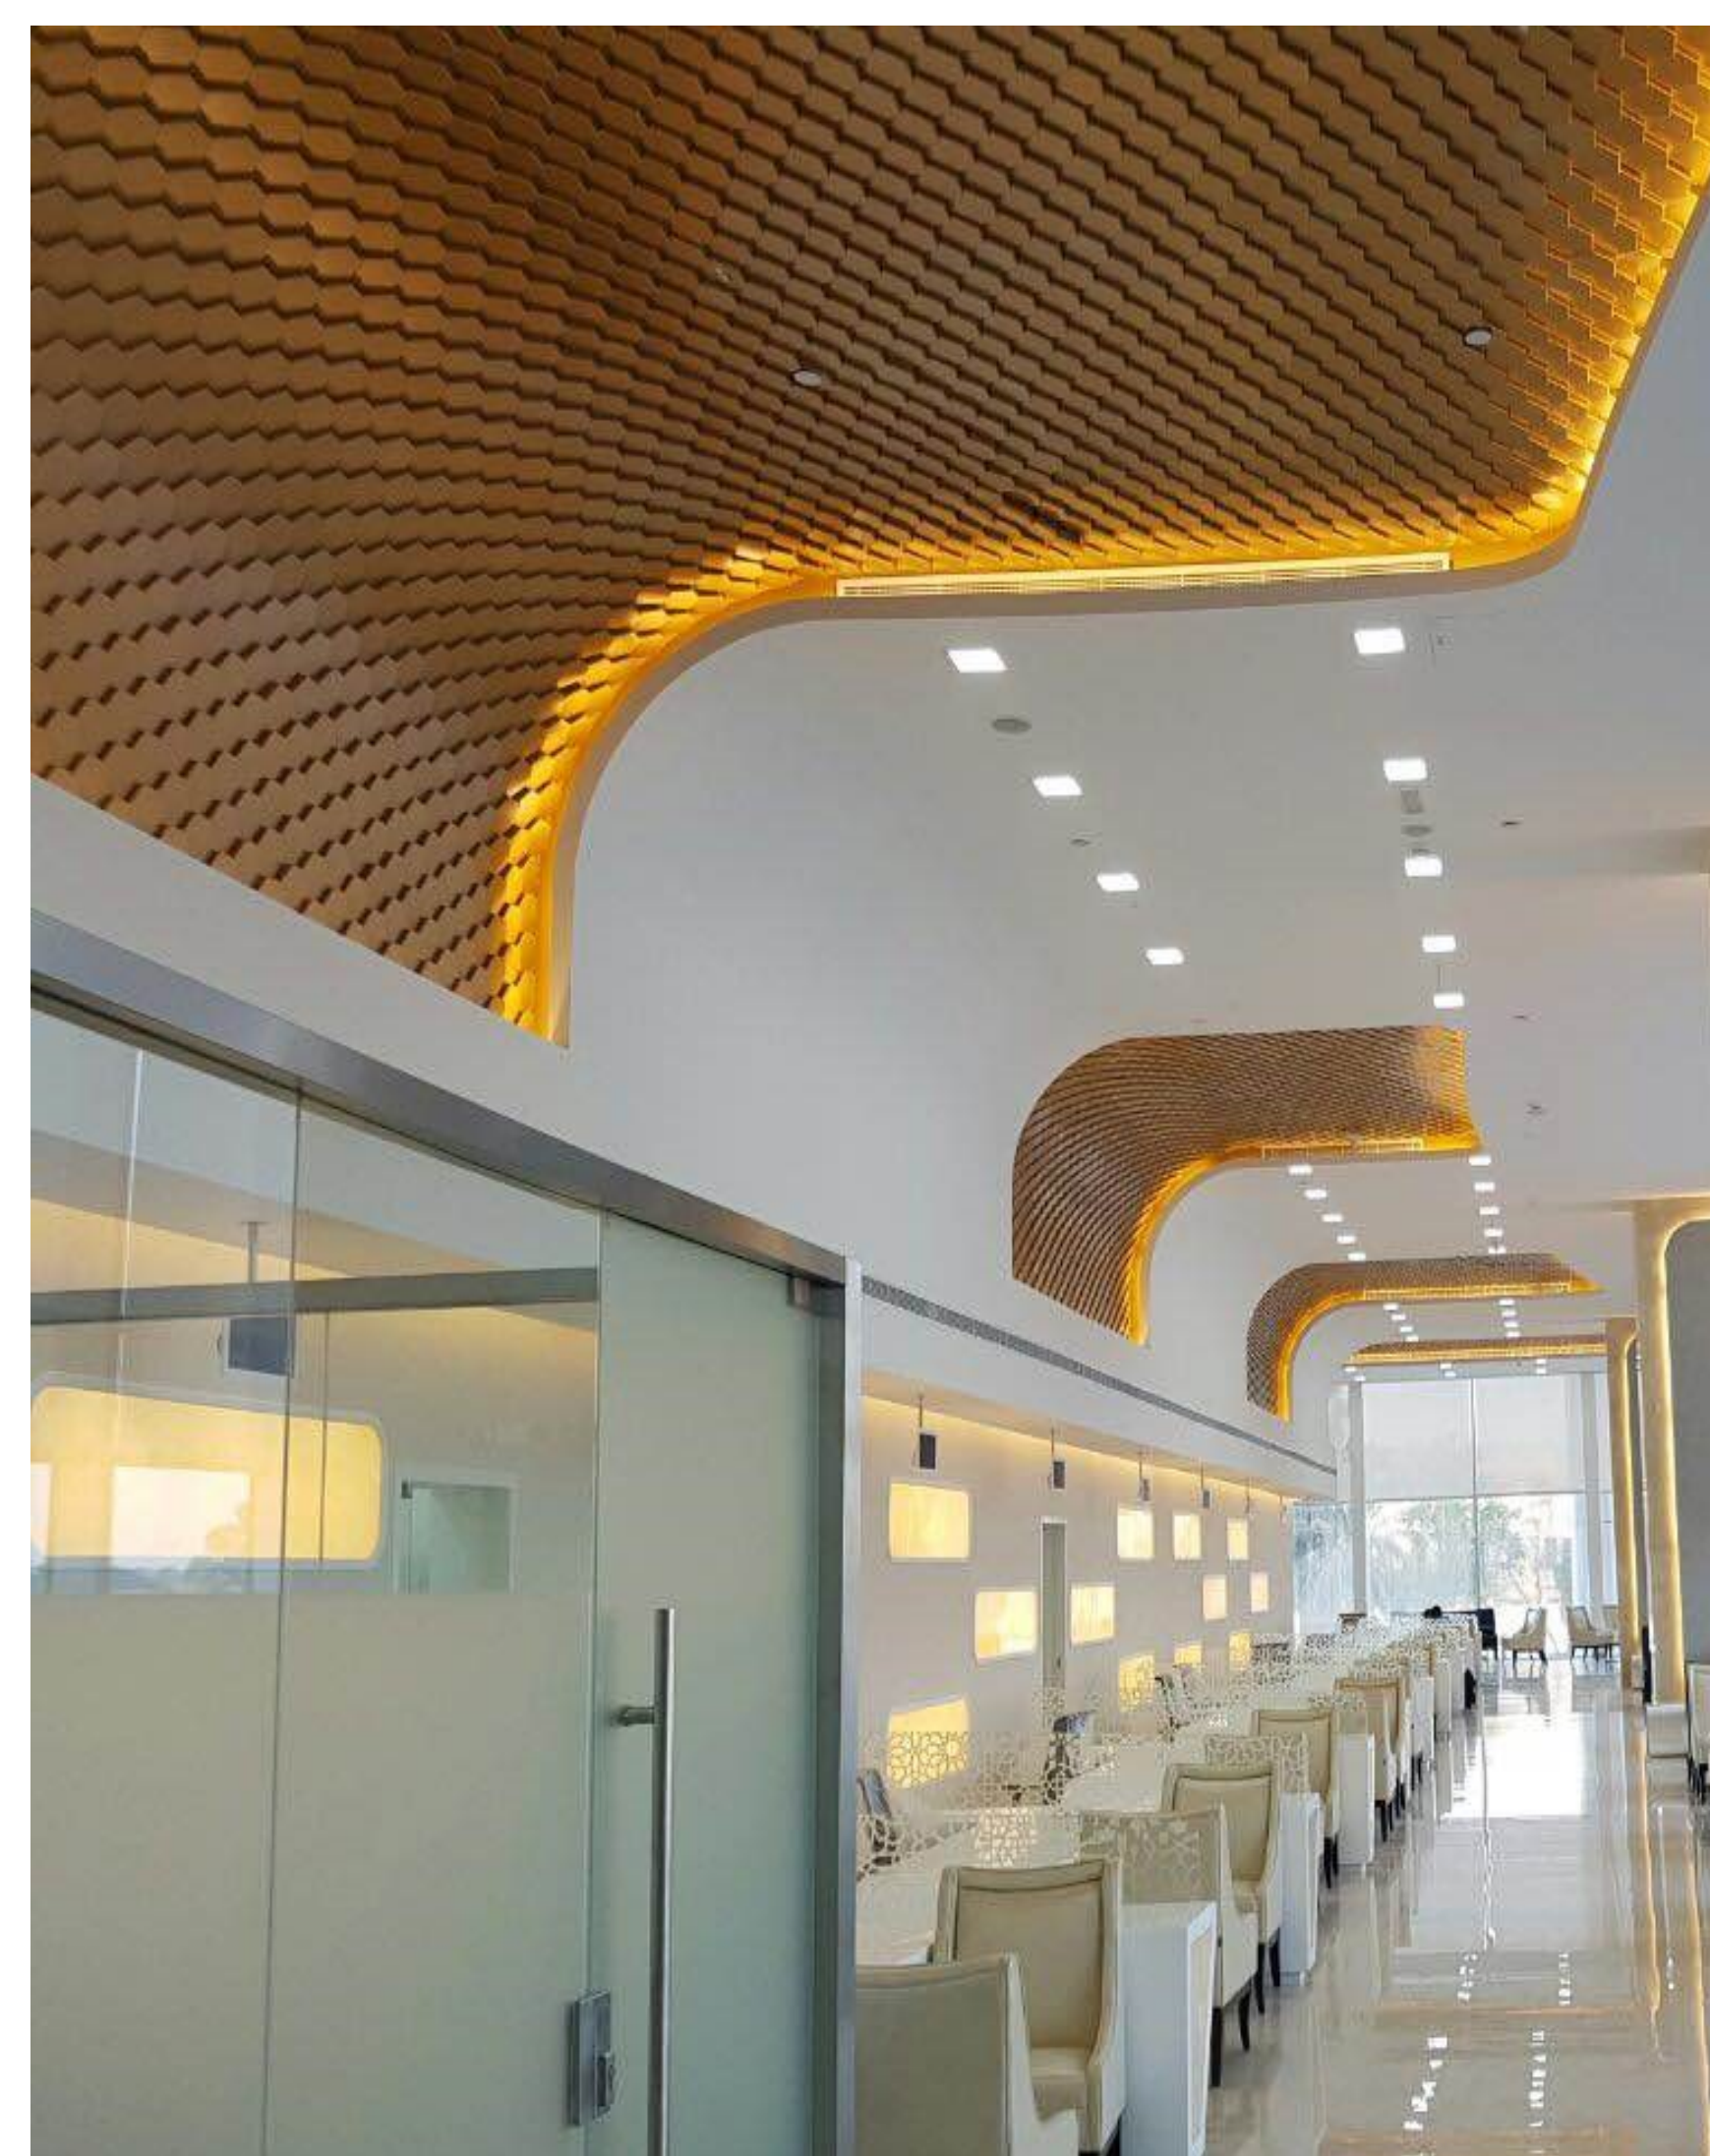

This small hexagonal tile is laid on a surface pivoted at varied angles to show differing shades and create subtle imagery and graphics.

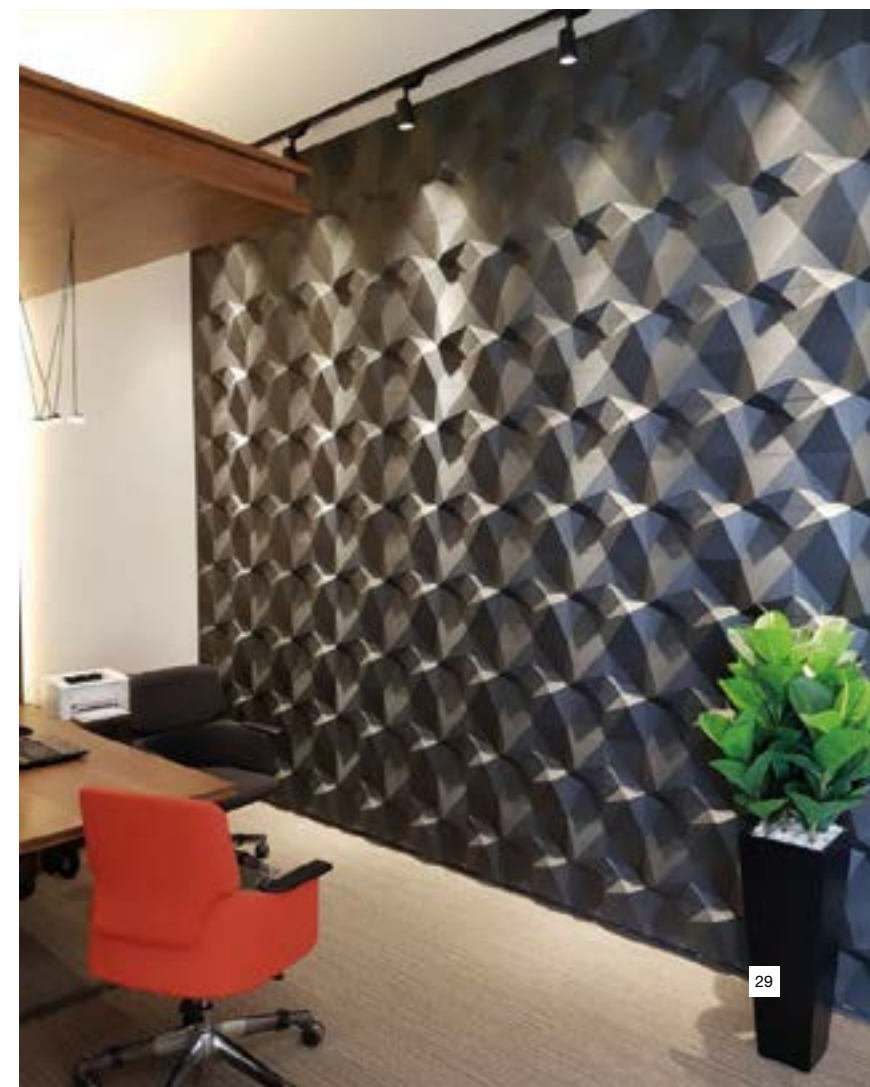

PENTA

Penta, from the Ancient Greek meaning “combining from of five” consist of a modular tile designed using irregular concave & convex lines at different highs and angles on the plan.

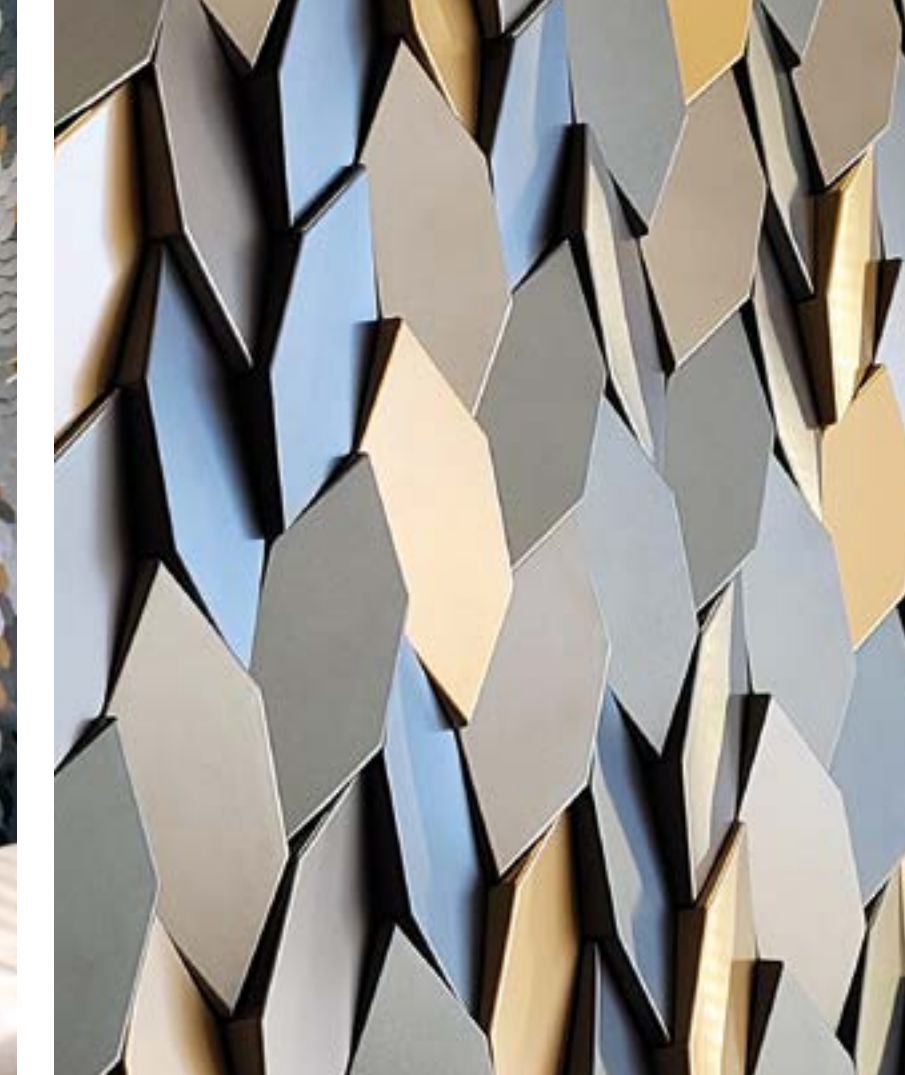

MABEL

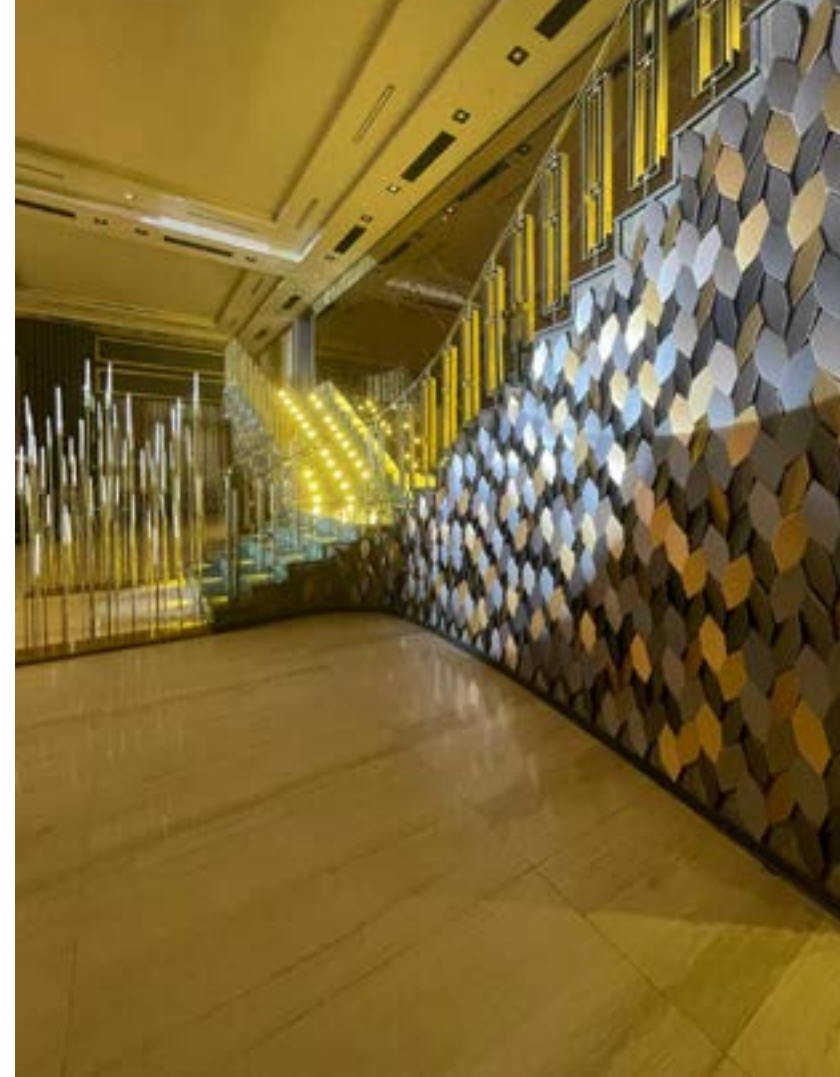

This small polygonal tiles in opposing directions to create a subtle geometric stripe. Design of the tile give a sense of depths to the Wall by playing with the lights and shadows created by Mabel 's polygonal geometry.

INDEPENDENT MOVES & INFINITE DESIGNS

ZETA

Featuring three-dimensional hexagonal tiles, “ZETA” is an elegant version of the honeycomb pattern that is available in both glazed and matt finishes as well as different colors.

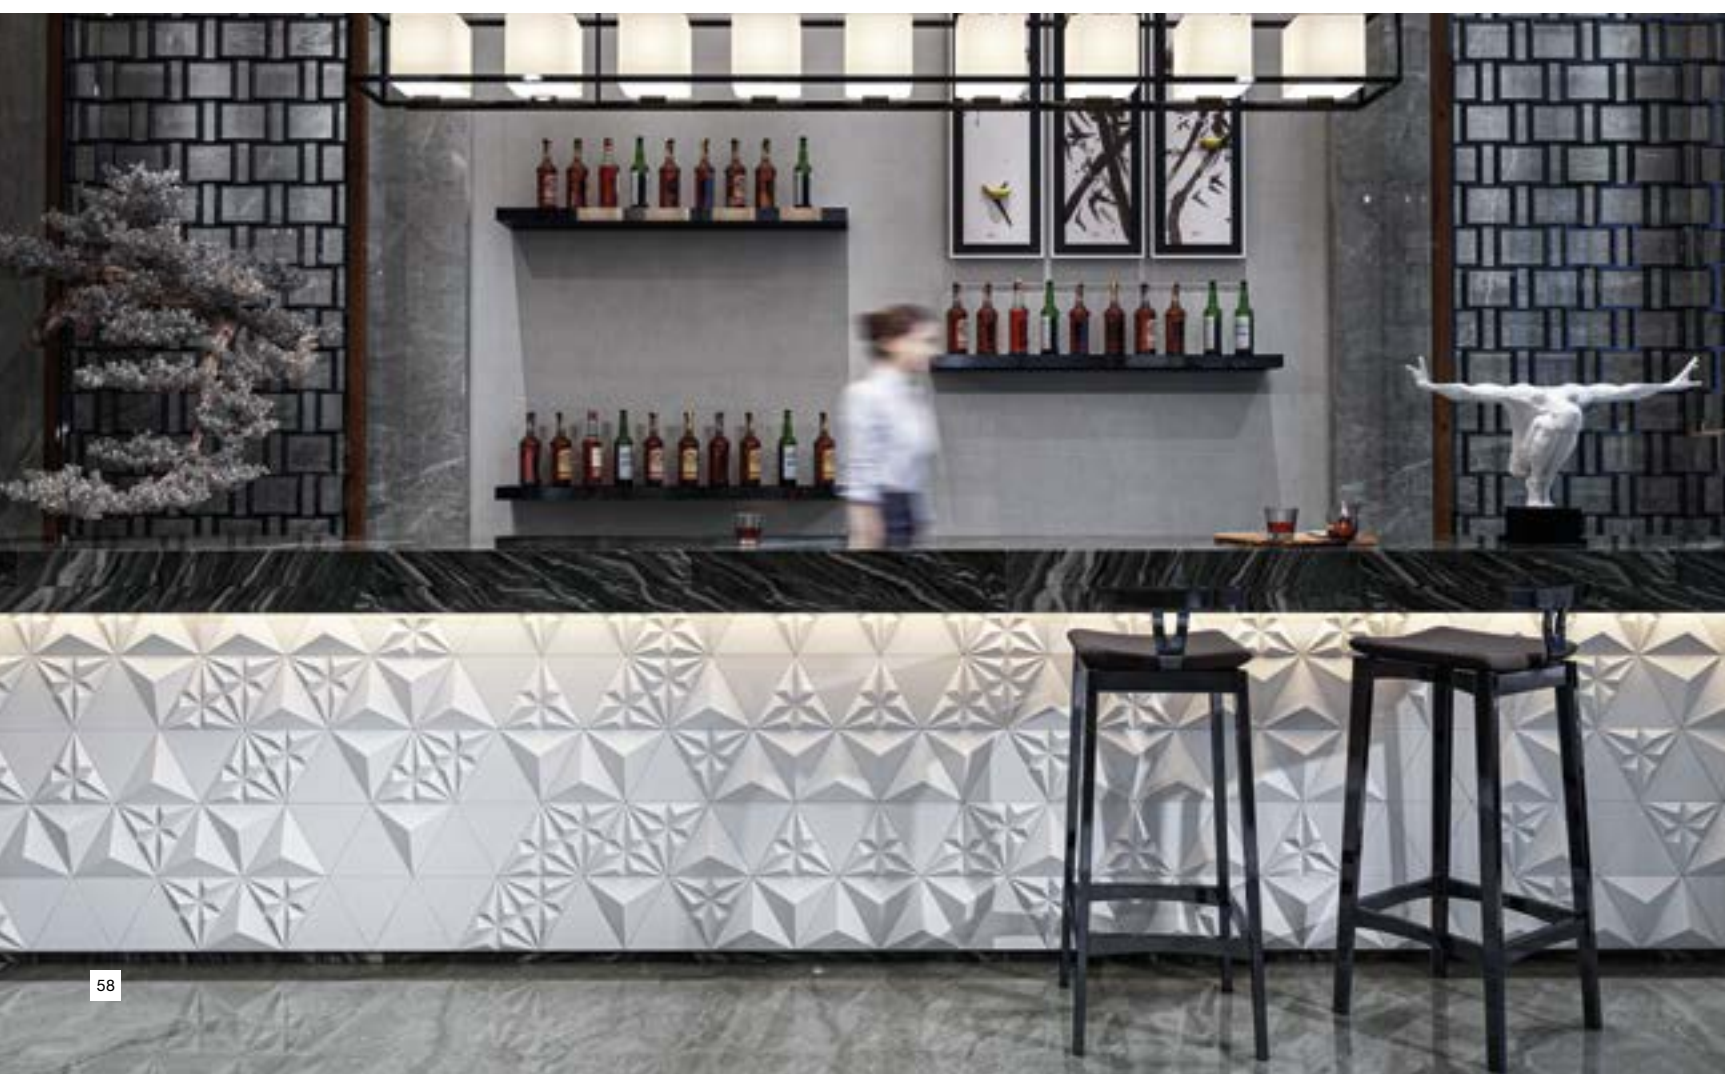

With this new generation 3D wall covering,
which you can use three different
tiles in the form of Flat, Pyramid and
Polygon together or independently, your
space captures the feeling of elegance.

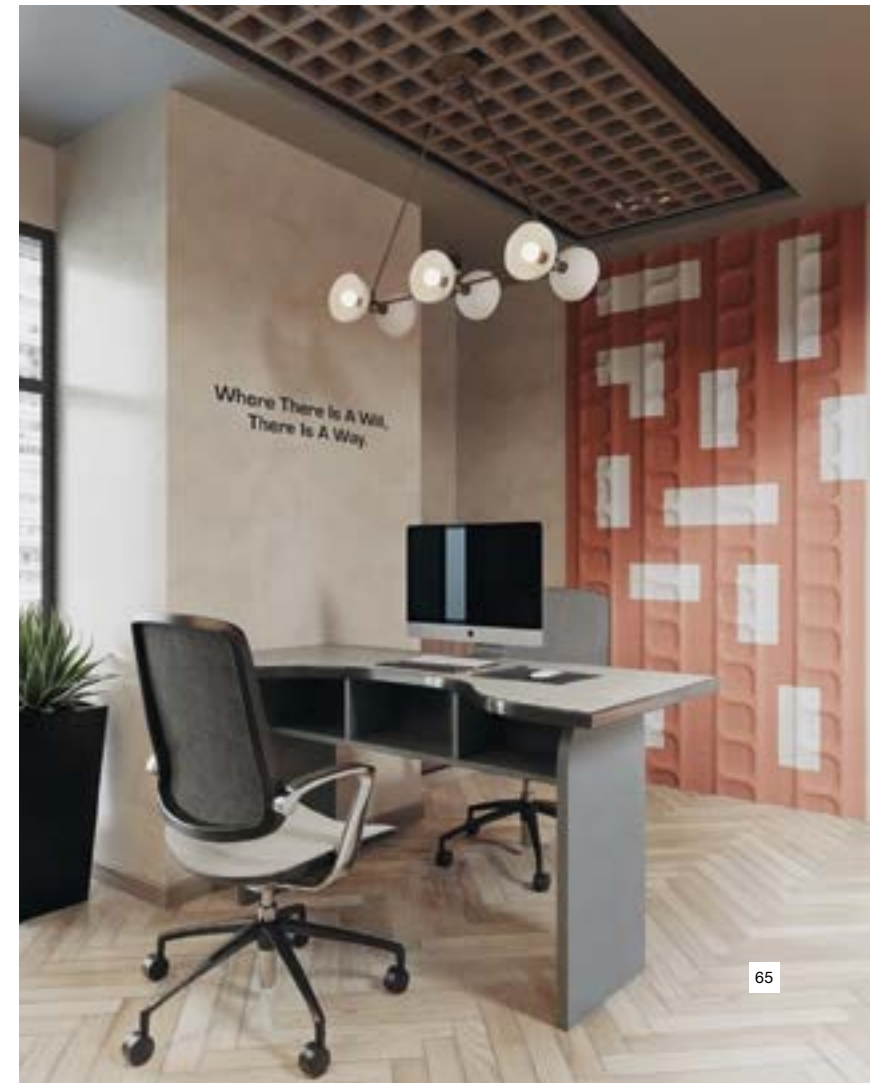

SO
HO

SOHO, which was designed by referring to the fluidity and simplicity of modern design, adapts to many spaces thanks to the diversity in its fiction and compositions. It creates an extremely warm ambiance with its stable and soft lines in its form.
