Did you know that Earth Day (April 22nd) is celebrated around the world? Following a horrible oil spill in the United States in 1970, someone recognized the importance of having a day to honor our one and only home planet, Earth. It's a day to reflect on how we affect the planet with our actions, and to set intentions about how we can make a more positive impact in the future. Individually, we can lessen our impact. Collectively, we can make a big difference.
