

Situational Awareness You Can Count On

Mission-critical, Real-time Video Transmission and Distribution

Respond faster and make informed tactical decisions!

LiveU solutions allow you to reliably transmit video from any source, such as Unmanned Aerial Systems (UAS), Unmanned Ground Vehicles (UGV), helicopters, dashcams and bodycams, to any destination, including HQ, Mobile Command Centers or even first responder devices, supporting your mission.

LAW ENFORCEMENT

FIREFIGHTING

SWAT OPERATIONS

SEARCH & RESCUE

REMOTE SURVEILLANCE

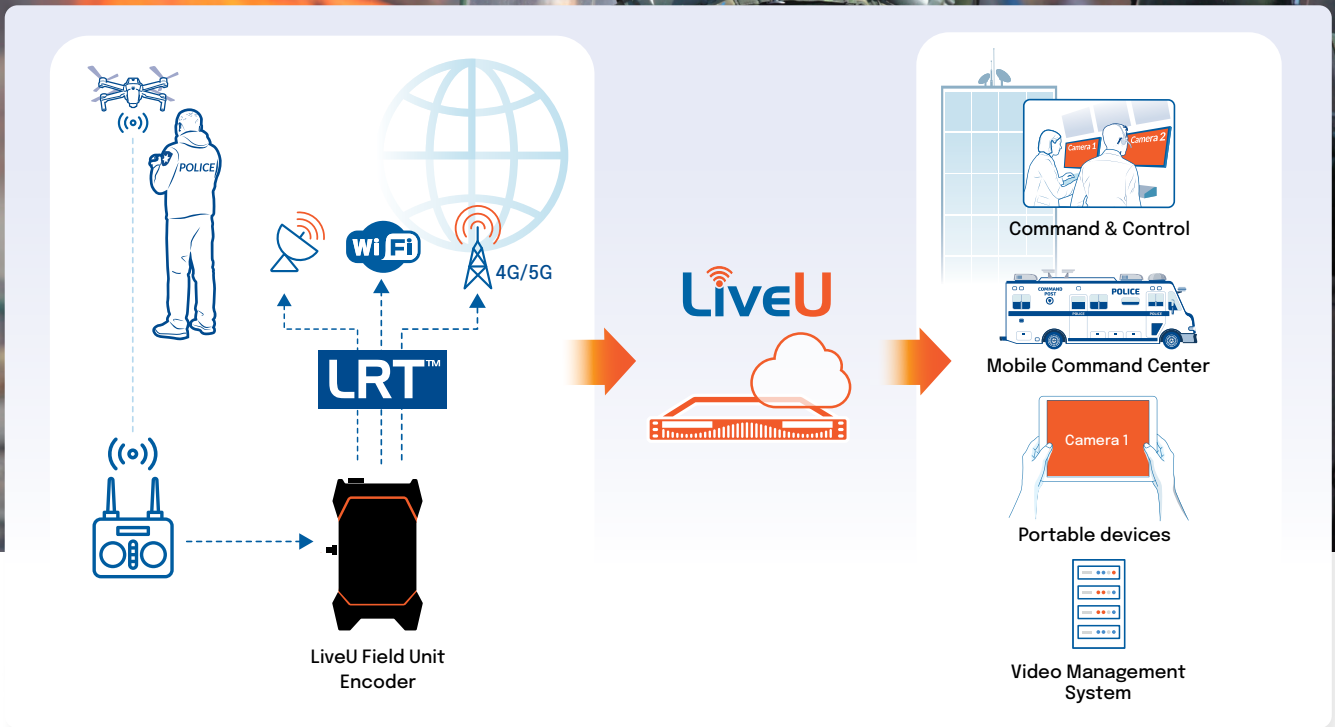

DISASTER MANAGEMENT & RECOVERY

Critical situations call for rapid deployment of video solutions that work regardless of network challenges.

LiveU's LRT™ (LiveU Reliable Transport) enables reliable video over IP, delivering diverse and resilient connectivity where low latency and high quality are demanded. LiveU IP-video encoders bond multiple connections together (cellular, WiFi, Ethernet, satellite), establishing reliable connections from the most remote locations.

Our interoperable solutions integrate with existing Video Management Systems (VMS) and situational awareness platforms, allowing you to effectively manage all your video.

Key Benefits

**RELIABLE & RESILIENT
VIDEO TRANSMISSION**

MOBILITY

**VIDEO MANAGEMENT
SYSTEM (VMS)
INTEROPERABILITY**

**VIDEO SHARING AND
DISTRIBUTION**

**360-DEGREE SITUATIONAL
AWARENESS**

LiveU – For Real-time Video Excellence

- Rapid deployment and ease of use
- High-quality, low latency real-time video
- Resilient and reliable connectivity
- Video sharing and distribution, enhanced collaboration and informed decision-making
- Global 24/7 support

LiveU and LRT™ are trusted by 1000 agencies all over the globe, providing mission-critical command and control, situational awareness and other solutions. Saving lives, time and resources.
