

**Real-time Reliable  
High-quality Video Transport  
and Distribution**

# Transmit Video from any Source

**Unmanned Aerial Systems (UAS)**

**Unmanned Ground Vehicles (UGV)**

**Helicopters**

**Dashcams**

**PTZ cameras**

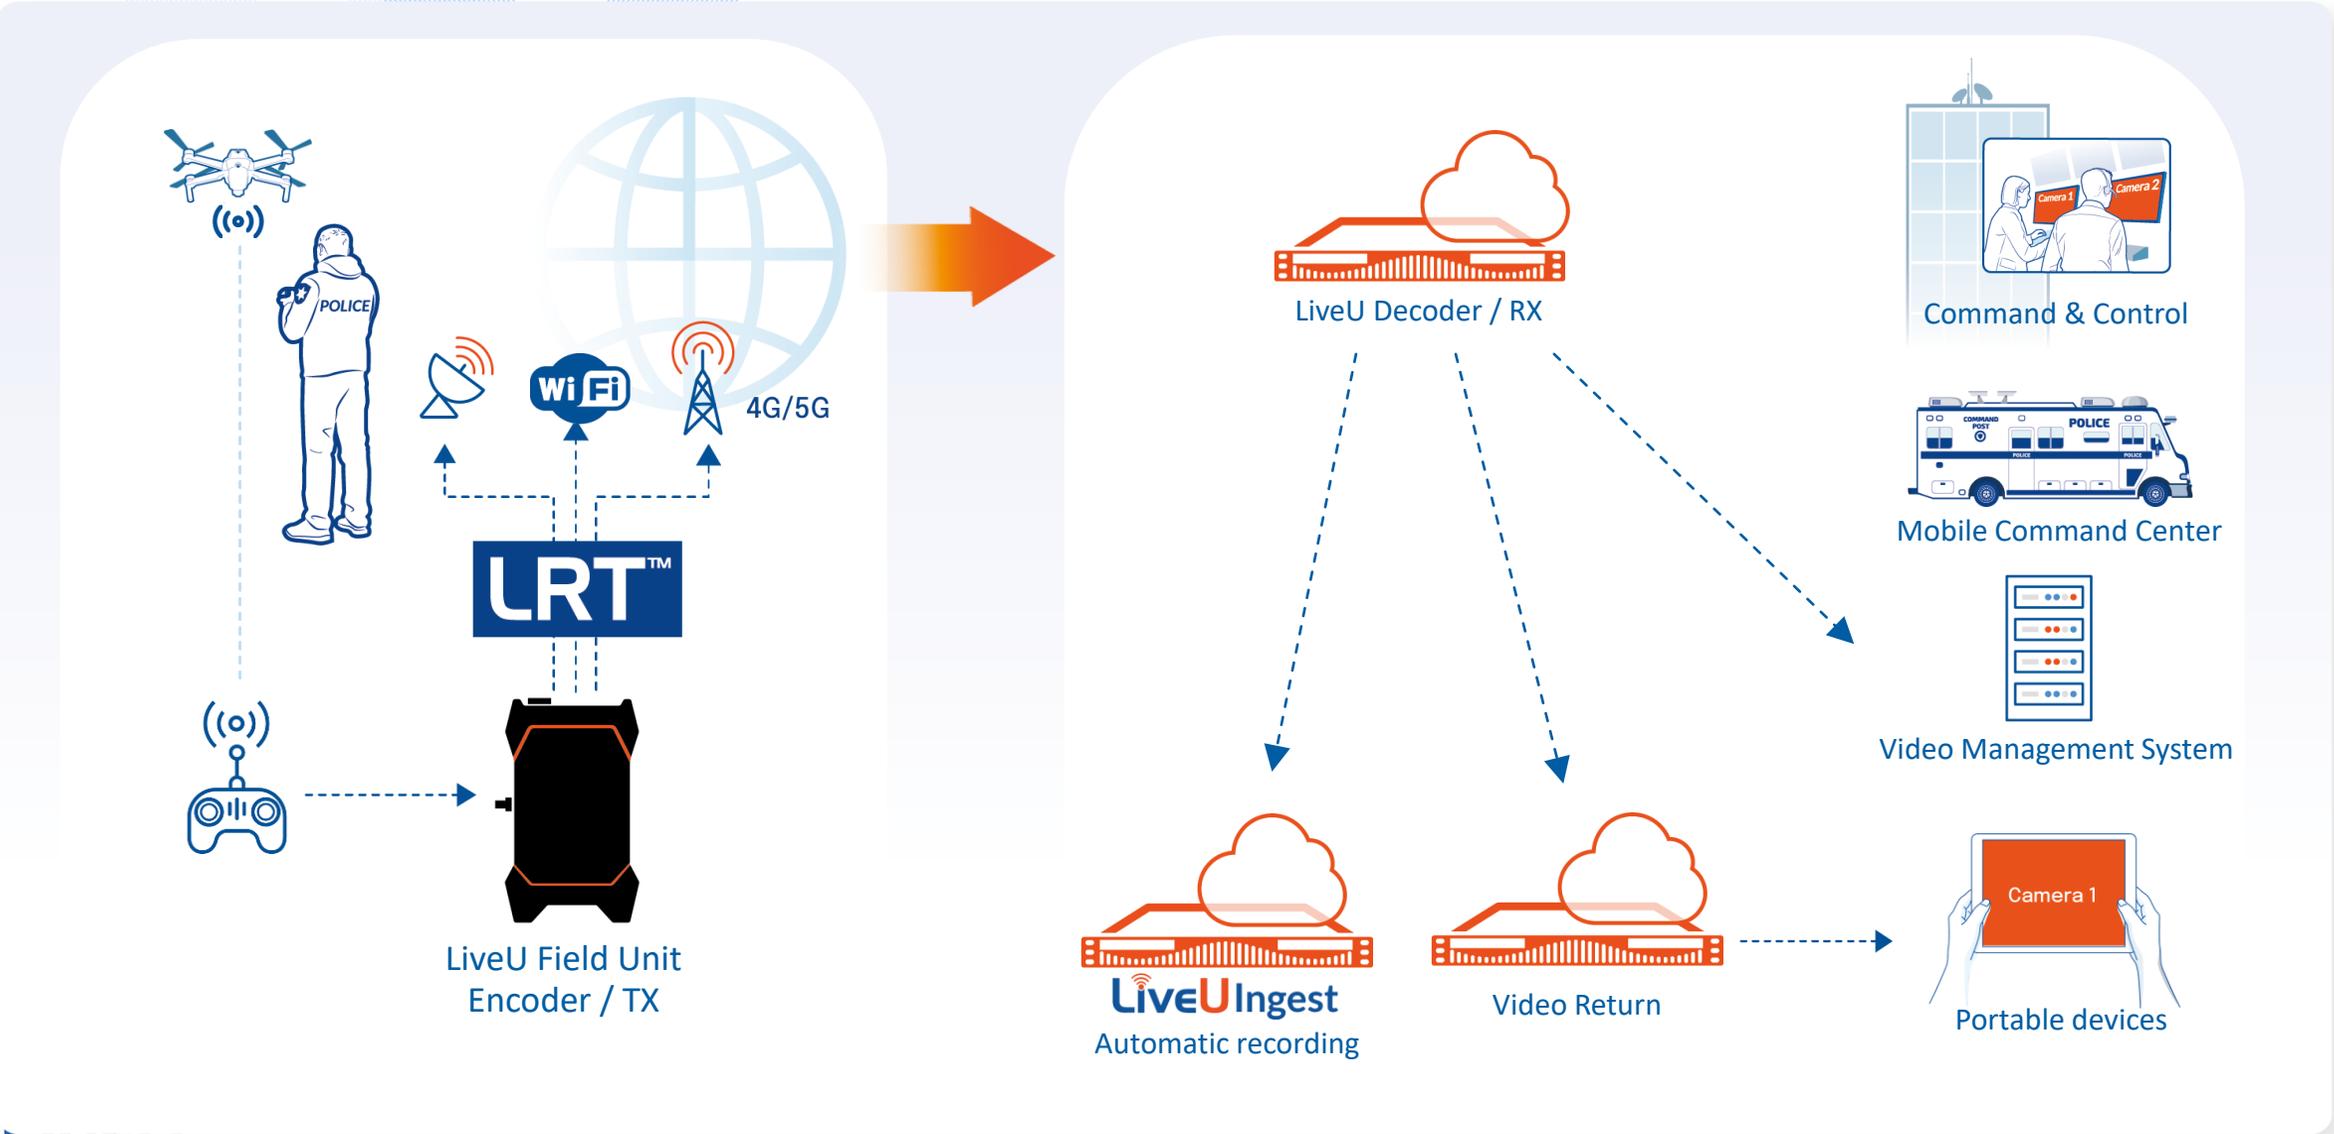

**School security cameras**

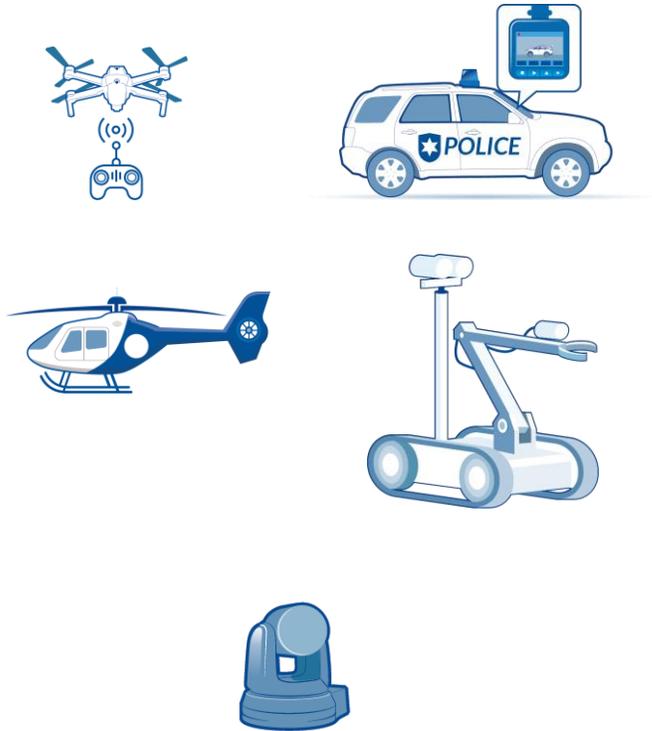

**School bus cameras**

# Transmit Video from any Source

# Real-time Reliable High-quality Video Transport and Distribution

Seamless video transport  
from any video source

A mobile solution that works  
everywhere with virtually  
any type of network,  
bonding all of them together

Low latency transport  
to any destination

Interoperable with  
your existing  
VMS / CDN

Video Management  
System

# Comprehensive Mission Support

**Law Enforcement**

**Firefighting**

**SWAT Operations**

**Search & Rescue**

**Remote  
Surveillance**

**Disaster  
Management &  
Recovery**

**Public events &  
crowd management**

**Emergency Medical  
Services**

# Bonding

Bonding: Splitting encoded video over **multiple operators and technologies** together, at the same time: Cellular, SATCOM (Ka/Ku, BGAN), Wi-Fi

## Capacity

Aggregates ALL detected networks: max bandwidth all the time

## Reliability/Availability

All networks, transparent simultaneous utilization

## Mobility

Man/vehicle-carried, from anywhere, including from moving vehicles, drones and helicopters

## Video

Sustainable continuous quality live video

## Economic

Any network support: 3G, 4G/LTE, 5G, SATCOM, LAN and Wi-Fi

# Key Benefits

**High-quality** with no compromises

**Reliable and resilient** video transmission

**Enhanced mobility** for on-the-go operations

**Broad visibility:** Borderless video sharing and distribution

Continue using your existing Video Management System (VMS) & Customer Distribution Network (CDN)

**360-degree** Situational Awareness

Global **24/7 support**

**First-grade** replacement service
