

Ergomat Polyurethane Profiles

The average production person spends over 7 hours per day on their feet, much of that time standing in the same area. That equates to over 1,820 hours of standing per year! With so much riding on how and where you stand, giving your feet a high-performance platform makes great sense. Ergomat matting acts like a shock absorber, protecting the body from jarring impacts while stimulating muscle activity to promote better circulation and reduce fatigue.

Standard Matting Sizes Available: 2', 3', 4', 5' & 6' (60, 90, 120, 150 & 180cm) widths X any length

ERGOMAT NITRIL available in Nitril, Nitril Conductive ESD, Nitril F, Nitril Smooth and Nitril Smooth Conductive ESD

- for electronics industry
- can be die cut for air flow
- for when static control is crucial due to sensitive material
- ISO Class 5 Nitril F

Nitril

Nitril F

ERGOMAT HYGIENE

- for food industry and laboratories
- designed for cleanability and sanitation
- cleanroom ISO Class 5

Hygiene

ERGOMAT NITRO

- for metal industry
- resistant to oils, many alkaline liquids and acids
- resistant to oil, petrochemicals
- resistant to hot metal shavings up to 1112 °F (600 °C)
- cleanroom ISO Class 5

Nitro

ERGOMAT SOFTLINE

- for metal industry
- can be die cut for liquid drainage
- ISO Class 5
- resistant to oil, petrochemicals
- resistant to heat up to 1112 °F (600 °C)
- anti-slip properties even when exposed to oils

Softline

ERGOMAT INDUSTRY available in Industry and Industry Basic

- hole mat designed for areas with extreme amounts of liquid
- for areas where ergonomics are no longer suitable
- Industry 5-year warranty - Industry Basic 90-day warranty

Industry

Industry Basic

ERGOMAT SUPER-SAFE MATS available in Ergo and Smooth

- unparalleled non-slip safety
- for extremely wet conditions and critical environments
- positive grip suction cups
- anti-microbial additive for reduced bacterial contamination

Super-Safe
