

Our heavy-duty height adjustable workbenches feature an SL Series electric 4-column lifting base from ErgoSwiss, which offers a robust and reliable foundation for applications requiring load management up to 2,200 lbs. Engineered to withstand bending, torsional and shear forces when fully extended, the columns ensure structural integrity under demanding industrial conditions.

**Technical Data:**

Column Material:	Anodized aluminum extrusion with 6 slots, 8mm
Lift Mechanism:	Internal motor and spindle drive on each column synchronized by a control box
Top Options:	Plastic laminate, cleanroom laminate, stainless steel, maple butcherblock
Adjustment range:	28" - 44" approx.
Max load:	2,200 lbs.
Lifting speed:	0.35" / s

Options:

- * Upright sets
- * Shelving
- * Bin rails
- * Lighting
- * Power modules
- * Cable manager

Manufacturer: ErgoSwiss - Widnau, Switzerland

Warranty: 2 years, limited
