Thermal SnapShot (no analysis)

Thermal & Vascular Patterns:

- visible inflammation
- migraine/headache
- sinus
- dental issues
- neck injuries
- thyroid
- shoulder injuries
- back pain/injuries
- joint pain
- stomach & gut pain
- soft tissue injuries

Thermal SnapShots show subtle and dramatic temperature differences (thermal patterns - such as inflammation). The thermal image provides a visual “heatmap” of the body, which demonstrates thermal and physiologic changes in complex tissue that will result from pain. “SnapShots” may be used to navigate and monitor your therapeutic progress when working with a team of health care providers. “SnapShots” do not offer a doctor’s analysis, diagnosis, recommended treatment nor offer to cure your current symptoms. Follow-up imaging is recommended at 3-6 months to watch your progress, results vary, depending on your health goals and therapeutic options.

Disclaimer: “Thermal Snapshots” do not replace professional clinical analysis or treatment. “Snapshots” are not comparable to a comprehensive infrared thermographic exam. Call 1-833-4-THERMS or visit www.thermographywellnesscenter.com for more information.
