

# Global Warming Schools Action Plan

- 1) Always turn off the power points when appliances are not being used.
- 2) Always use the half flush, where possible.
- 3) Always open up the curtains and blinds and enjoy natural sunshine
- 4) Always use the lights... When it is dark!
- 5) Always recycle papers and plastics and place them in the correct recycling bins.
- 6) Always plant native plants.
- 7) Always recycle paper and other materials in art; old shoe boxes, toilet rolls, egg cartons etc.
- 8) Always keep windows closed on cold days to keep the heat in and open them on hot days to let the heat out.
- 9) Always use water from your school's water tank to water the plants.
- 10) Always place containers under drink fountains to collect water – the plants will really thank you for it.
