

**Hi-Flow™**

The Hi-Flow™ is an **accurate and rapid** dispenser used to deliver liquid nutritional vaccines, or topical medicants by means of injection, oral drenching or pour-on. The Hi-Flow™ is designed to refill the barrel consistently after the contents are dispensed.

Adjustable dosage sizes range from 0 ml to 75 ml.

**Hi-Flow™ Features**

- Simple and accurate dose adjustment.
- Variety of nozzle configurations.
- Improved ergonomics with soft touch grips.
- Long term use with proper care.
- Easy to clean with soap and warm water.
