

LECTRAVETTM

The **LectraVet™** injection system is a battery-driven electric instrument designed for treating animals in high volume and confinement operations with reliable and consistent dosage delivery of vaccines and medicants. The built in control panel allows the user to change dosage sizes from 0.25 CC to 5.0 CC.

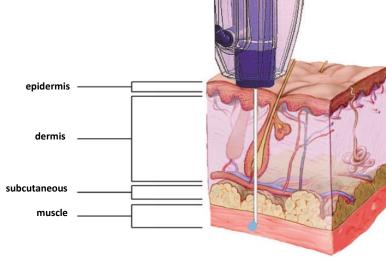

Features and Benefits:

- ✓ Short set-up time
- ✓ Low-Force Trigger allows for accurate and consistent rapid dose
- ✓ Built in control panel
- ✓ Minimal maintenance
- √ 4,000 injections on a single charge
- ✓ Operate in line feed mode or attach a bottle
- Deliver injection to multiple tissue depths, from subcutaneous to intramuscular

Rechargeable Battery Pack can deliver 4,000 injections on a single charge.

Deliver injection to multiple tissue depths, from subcutaneous to intramuscular.

With Genesis Instruments, you speak to real people with technical expertise who will provide personalized service and support. We proudly stand behind our products with extraordinary service, support and troubleshooting techniques.
