

**Power Doser™**

The Power Doser™ is an Air or CO2 operated medicant delivery system manufactured by Genesis Instruments. This system can be utilized with all livestock medication needs and is capable of delivering an accurate and consistent dose whether you are injecting, drenching, pouring, or spraying. The Power Doser™ can be used with large groups or small groups of animals. It will administer the same accurate dose rapidly even if using on thousands of animals. It is light weight and reduces hand fatigue. This system is easy to clean with soap and warm water. The capacity of this system ranges from 0 ml to 150 ml and is offered with a wide variety of nozzles.
