

The Genesis Instruments **Injectable Pump It™** is a low cost vaccination instrument with a fixed dosage volume ranging from 0 ml to 2 ml. Dosage / actuation is fixed with accuracy of less than 3% error. The **Injectable Pump It™** has a unique design with the bottle mounted on a 45-degree angle with a self-contained vented spike. The 45-degree design balances weight for an accurate injection. This instrument is ideal when using 60 cc or 120 cc plastic serum bottles, as well as 100 cc glass serum bottles.

## Features & Benefits:

- Compact, ergonomic instrument
- Low cost all-plastic instrument with reliable and repeatable delivery
- Luer Lock or Luer Slip needle fitment option
- Short stroke reduces hand fatigue
- Unconventional design providing users with ease
- Available with or without bottle mount
- Long term usage with proper care
- Variety of configurations and custom colors available
