

## Occupational Hygiene in the Mining and Mineral Processing Industries

This OHTA course is being presented by Ross Di Corleto (Monitor Consulting Services) in conjunction with Ian Firth (IC Firth OHs Solutions) with over 70 years combined experience in the mining and resources industries.

This five day course is targeted to those with a foundational and intermediate knowledge of occupational hygiene. It has been designed for occupational hygienists or suitably qualified occupational hygiene technicians (AIOH Basic Principles, Ventilation Officer IFAP or similar) who wish to extend their knowledge base in the area of mining and mineral processing.

The course aims to provide specialist information relating to processes and workplace situations likely to arise in the mining and mineral processing industries. It provides guidance as to how those situations can be assessed and managed.

The course also incorporates three half day CES sessions:

- Occupational health risk assessment
- Heat stress assessment and management
- Statistics of hygiene

Additional topics to be covered include:

- History of mining and mineral processing
- Summary of relevant processes
- Equipment and associated hazards
- Hazards of mining, processing and refining
- Physical hazards and intrinsic safety
- Communication and record keeping

When: 12<sup>th</sup>— 16<sup>th</sup> February 2024

Where: Rydges Brisbane Southbank.

Price: \$2200 (GST incl. )

AIOH COH point accredited course
