

CONTEST RULES FOR MODELZONA

1. The Craig Hewitt Chapter of IPMS/USA is hosting this contest. This is an open contest, with no club affiliation or membership required for entry. A separate entry form must be completed for each model entered. Each model entered must be the sole work of the individual whose name is on the entry form. Any model found to be the work of someone other than the entrant will be disqualified.
2. Models will be entered at the registration table from 9:00am until 12:00pm on the day of the contest. Late entries may be accepted, at the discretion of the Head Judge, until judging for a category has begun. No entrant will be allowed into the model area before the registration of the entrant's model(s). No model may be removed from the display area until after all awards have been presented, unless approved by the contest chairman. **Table space is limited - Unusually large scaled models, large dioramas and/or displays requiring power must be approved prior to the day of the event.**
3. Junior entrants are defined as entrants 17 years of age and younger. At their own discretion, juniors will be permitted to compete in senior categories. Entrants may not compete in both junior and senior categories.
4. Any model that has won any award in a previous Craig Hewitt open contest will not be eligible for an award. Any model that has won any award in the current year's IPMS/USA National or Regional contest is eligible for an award (prior year's winners are not eligible). Because Modelzona is a fall event, we allow such entries to accommodate projects completed just prior to the National Convention.
5. The entrant will be responsible for the correct category and class assignment of their models. The Head Judge will have the final decision relating to the placement of a model within the various classes and/or categories.
6. The Head Judge and judging committee will decide on the expansion and/or combining of categories.
7. Each model entry may have supporting written or photographic documentation that the entrant wishes to include for review or clarification by the judges. The judges may require authentication of specific models.
8. The Head Judge will exclude/remove from competition any entry considered by contest officials to be inappropriate or offensive to generally acknowledged standards of taste and acceptability. The Head Judge has final authority to resolve concerns. IPMS national contest rules will be used as guidelines in this area. All Head Judge's decisions are final.

9. Modelers may win more than one place in a category, including out of the box.

10. If a model with groundwork and figures is entered in the regular categories then only the model of the main subject will be judged (not moved). This works to the advantage of the entrant in that they may have wanted to recreate a small scene for themselves but they know that their figure painting skills may not be up to par and that a story line may not be in line with what is required in the diorama category.

11. Single figures may be displayed on small landscaped bases and remain in the appropriate figure class. However, two or more figures on a landscaped base of any size shall be considered a diorama or vignette, and shall be placed in the appropriate class.

12. A conversion model must represent a version different from that provided by the basic kit. The conversion must contain significant structural modifications to the basic kit involving extensive changes in contour or configuration. In addition to the normal judging criteria common to the entire contest, judges of the conversion category will give special consideration to the complexity of the conversion. A conversion accomplished with primarily commercial aftermarket parts will be at a disadvantage, therefore, against a conversion accomplished primarily by the builder's craftsmanship - assuming both are finished to similar standards. Simple conversions may be entered in regular categories. More extensive conversions, however, must be entered in the appropriate conversion category. The builder must detail the conversion changes made to the base kit on the entry sheet or accompanying documentation. Judges have the ultimate authority to determine a model's category placement, and such decisions by judges will be final.

13. A scratchbuilt model may incorporate parts from other kits, but these should be generally unrelated to their original identity, except for minor parts such as wheels, guns, etc. Models determined to be scratchbuilt must be entered in the proper scratchbuilt category.

14. In the automotive category, the following definitions shall apply:

A) A competition vehicle represents any vehicle used in speed or timed competition events.

B) Street rods and street machines may have modifications like spoilers, trims, wheels, etc., but must represent a street legal vehicle.

C) A low-rider vehicle may include functional hydraulic components: however, hydraulic components will not be judged.

D) A factory stock/production vehicle will appear stock with no changes which deviate from factory stock, including frame, body, engine, wheels, or tires. After-market equipment is acceptable so long as it represents stock equipment on the original vehicle.

E) Customs. Entries must have significant body modifications to create a vehicle with a unique or personalized appearance. Modifications typically include changes in the shape of the body and/or other visual aspects of the vehicle, such as channeling, sectioning, chopping or reconfiguring. Wheel/tire changes and or custom paint alone are not sufficient to qualify for the custom category

15. Out of the box (OOTB) entries will be governed by the following rules:

A) Any commercially produced kit may be used.

B) The natural plastic finish may be retained, or it may be foil covered or painted. Decals other than those included in the kit may be used.

C) The modeler may fill seams and gaps, sand off rivets, drill out gun ports or exhaust pipes, thin appropriate openings, and thin to scale such parts as trailing edges, flaps, and doors. The modeler may add rigging and antennas. The modeler may add simple tape or decal seat belts in the cockpit of an aircraft or the interior of a vehicle. No manufactured hardware, i.e. buckles, instruments, etc. will be permitted.

D) The instruction sheet from the model entered must be included with the entry form.

16. Pre-finished models, such as Revell Profinish, may be entered, by juniors, in the appropriate category. Unless documented proof is provided that the entrant refinished the model, the model will be judged as unpainted.

17. Models will be judged in accordance with the IPMS/USA current national rules for the past National Convention (see here): in general, basic construction; to include alignment, seams, glue application. Basic finish; to include paint application, decal application, overall appearance.

18. Models are judged as three-dimensional objects and are examined in all aspects. Entries will be handled by judges, both for proper category placement and for judging, as required.

19. Entries with cases covering models will be allowed but said cases must be removed by the entrant prior to judging. Any exceptions to this must have the Head Judge's approval.

20. The Head Judge shall determine the final interpretation and implementation of these rules. Decisions of the judges are final. Special awards will be awarded at the discretion of the judges to qualifying models, with the exception of privately-sponsored awards which shall be awarded by their sponsors, as follows:

JUDGES BEST OF SHOW

SPECTATORS CHOICE

BEST AIRCRAFT – Chuck Ludwig Memorial Award

BEST MILITARY VEHICLE

BEST SHIP

BEST AUTOMOTIVE

BEST FIGURE

BEST SPACE AND SCIENCE FICTION

BEST DIORAMA

BEST MISCELLANEOUS

BEST JUNIOR
