

Kosel Industries Sdn.Bhd.

(A subsidiary of **ELPIJI** Group)

Certificate No: 404003

Kosel Industries Sdn Bhd is the proud manufacturer of **ELIXIR**

electronic LPG filling systems from Malaysia.

Kosel Industries is an ISO-certified manufacturer and **ELIXIR**

electronic filling system is approved by IEC and ATEX.

ELIXIR electronic filling system is now installed in 5 continents and more than 50 countries.

Kosel Industries is the only manufacturer from Asia that offers cost efficient electronic LPG filling solutions to an international clientele.

As of 2009, more than 50 **ELIXIR** filling carousels and 1,000 filling machines are operating in India and Indonesia respectively.

Stationary Filling Machines for 50-kg cylinders

- **ELIXIR** Stationary Filling Machines are designed to fill cylinders ranging from 2.5 kg to 50 kg with a filling accuracy of +/- 100g.
- **Cybil** reporting software for efficient production management.
- Two different filling heads can be fitted on an **ELIXIR** Stationary Filling Machine to allow flexibility in filling operation.
- Can be equipped with a self-decoupling or manual filling head for filling cylinders with compact valves.
- Can be equipped with a pneumatic manual or manual filling head for filling cylinders with POL filling heads.

Special Features

1. Personal Identification Numbers (PIN)

Up to 9 PIN (4 digit numbers) can be assigned into the filling machine.

The operator must enter his valid PIN before cylinders can be filled.

2. Cylinder Category Numbers

Up to 10 categories of cylinders can be pre-set for ease of operations.

3. Display

The following totals can be displayed in the keypad:

- Valid fills only
- All fills
- Valid fills and all fills by user number
- Valid fills and all fills by category number
