

INSTRUCTIONS TO USE THE MEASURING TAPE

- Download the Pro-Spec Measuring Tape PDF from the website.
- Print the PDF by clicking on “ACTUAL SIZE” in more settings. Refer the below pictures

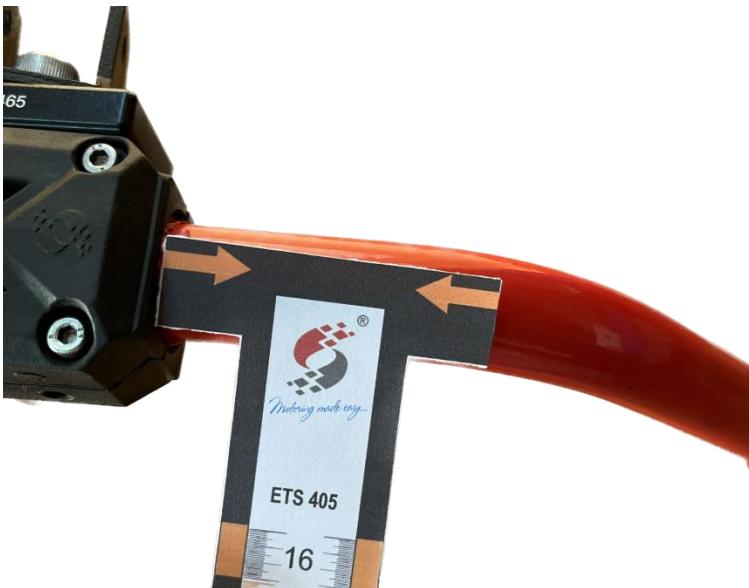

- After taking the print by clicking on Actual Size, take the measuring tape and place the top end on to the pipe (Crash guard pipe/engine guard pipe) and roll the measuring tape around the pipe. The number which coincides with the arrow mark on the top end which is on the left and right indicates the pipe thickness.

PICTURE GUIDANCE

Measuring Tape used on bent pipe surface

Place the measuring tape and wrap it around the pipe

Measuring Tape used on straight pipe surface
