

# WELCOME BACK!! WE ARE SO PLEASED TO SEE YOU AGAIN!

On May 22, the Office of the Provincial Health Officer issued an order\* that places where meals and drinks, including drinks containing liquor, are prepared and served must not exceed 50 percent of their usual capacity of patrons at one time.

This order also restricts tables to parties of six people, and requires 2 metres between patrons sitting at different tables, and between patrons from different parties sitting at a bar or counter.

## HERE'S HOW WE'RE DOING OUR PART:

- ✓ Disinfecting all high traffic areas with viral disinfectant spray no less than every 20 minutes (high traffic areas include: all counters in restaurant, all taps, doorknobs, surfaces accessible to public, washrooms, POS screens, etc.)
- ✓ Disinfecting card payment terminal with viral disinfectant spray between each transaction
- ✓ Disinfecting tables and chairs with viral disinfectant spray between each use
- ✓ Maintaining a distance of at least 6 ft between all tables to ensure social distancing protocol is obtainable
- ✓ Ensuring an unobstructed route to washrooms that meets social distancing protocol
- ✓ Removing all salt & pepper shakers, sugars, etc. from each table after use and disinfecting outer surface with viral disinfectant

During table service, we ask that an area of the table be left open for the server to safely access table to provide service. We will remove a chair, if needed, to create said space. We will be providing each table with their own water pitcher and cups, individual place settings, etc. and ask for guest's assistance with distributing as needed.

Our service team is more than happy to help our guests with any questions or concerns that come up; however, we do ask that guests be patient with our staff and the new protocols in place. We are all in this together - let's help each other out to ensure a safe and enjoyable experience for everyone!

WE LOVE YOU!!

XOXO,

- Pluto's

\* If you would like to review a copy of this order please ask your server ☺
