

Take Climate Action Now!

The CANWM Climate Charter includes this poster showing actions each of us can take in our homes, workplaces and communities. The table at the end includes links to background information and more resources for each idea. Additional links for each idea are shown as “[+]”. If you know of other useful resources, or you spot any errors such as broken links, please leave a message on the website “Contact Us” page.

Theme	Climate Charter Points	Personal	Local	National / Global
Energy & Consumption	<ul style="list-style-type: none"> Generate the energy we need from renewable sources - wind, solar, tidal and wave, to be delivered by suppliers for public benefit. Leave fossil fuel reserves in the ground. Stop the use of fracking and ban further oil, coal and gas exploration. Phase out dangerous nuclear energy. Reduce our consumption of all resources including energy and water to sustainable levels. 	Switch to clean energy Reduce, reuse, recycle [+][+] Discover your "carbon footprint" [+]	Join a community energy scheme Share skills and resources in your community	Oppose fracking Lobby for renewable energy
Transport	<ul style="list-style-type: none"> Invest in a rapid and massive shift towards low carbon, clean public transport free at the point of use. Promote cycling, walking and car sharing options. Halt airport expansion and end unnecessary short-haul flights.
