

Ring Tail Films specialises in producing wedding films. We've been doing this full time since 2004, and we know our stuff, but we also change and move with the times, keeping our style modern and fresh. We focus on creating a unique video that truly captures you, your closest family, friends and the emotions, smiles and tears of the most important event of your life.

First pick how many hours of pre-wedding coverage you would like. Next choose one-cameraman or two-cameraman coverage. One cameraman means pre-wedding events will be covered in highlight form only. Meaning the best bits will appear in your highlight videos. Two cameramen coverage means on top of the highlight videos, you will get full real-time edited videos of each event from start to finish.

The ceremony day and reception day are fixed rates with two cameramen, meaning you get both real-time and highlight footage on these days.

Finally, pick your highlight video option.
