

FLEA AND TICK WAIVER

At Wags and Wiggles, we put your pet's health first, and safeguarding them from the nuisance of fleas and ticks is a top priority. These troublesome critters not only bring about discomfort but can also pose health risks. We are dedicated to offering you valuable insights into reliable flea and tick control methods and specialized shampoos, ensuring your beloved companion remains in the best of health and spirits.

UNDERSTANDING FLEAS AND TICKS:

Fleas: These tiny insects can quickly infest your pet's coat, causing itching, irritation, and sometimes allergic reactions. Fleas can also transmit tapeworms.

Ticks: Ticks are arachnids that attach to your pet's skin and feed on their blood. They can transmit various diseases, including Lyme disease and Rocky Mountain spotted fever.

SPOTTING FLEAS AND TICKS:

- Excessive scratching or biting
- Visible pests in your pet's coat
- Red or irritated skin
- Hair loss or hot spots

PREVENTION IS KEY:

Preventing flea and tick infestations is far easier than treating them. Here are some essential tips:

Regular Grooming: Professional grooming helps detect and address fleas and ticks early.

Topical Treatments: Consult your veterinarian for recommendations on spot-on treatments

Flea and Tick Collars: These collars can provide protection for several months.

Environmental Control: Regularly clean and vacuum your home, wash pet bedding, and treat your yard if necessary.

THE IMPORTANCE OF PROFESSIONAL GROOMING:

Frequent appointments at Wags and Wiggles play a pivotal role in ensuring your pet's overall health and happiness. Our skilled groomers are adept at identifying fleas and ticks, and we employ safe, proven products to shield your pet during grooming sessions. Please note that flea and tick baths may entail additional charges due to the specialized shampoos and extended grooming time involved.

Consult Your Vet: If your pet has a specific condition or you're uncertain about which product to use, consult your veterinarian.

OUR COMMITMENT:

At Wags and Wiggles, we're dedicated to the health and happiness of your pet. Our team is here to answer your questions, provide advice, and offer grooming services that can address your pet's Flea and Tick needs.

Remember that prevention is your best defense. If you suspect your pet has fleas or ticks, consult your veterinarian promptly.

Protect your pet and enjoy a flea and tick-free life together!

TREATMENTS:

Make sure to wait at least 2 weeks after a Flea and Tick treatment before bathing your pet, to ensure the treatment works at maximum potential, or apply after groom.
