

How does it work?

Products

Drum Mixer – For small batches & quality assessment

Pan Mixer – For larger, more homogeneous casting batches

Innovation in Pre-Casting

Produces pre-cast construction components in two sections:

✓ **Material Mixing** with mechanical mixers (drum & pan type)

✓ **Component Moulding** with adaptable and customizable moulds

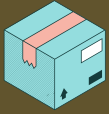

Dedicated Lab – Testing fresh & hardened concrete

**Pilot Line 8:
Cement-free
materials and
components
(CETMA)**

Daily Production Capacity

2 medium-sized slabs
(60x60x10 cm³)

5 smaller pre-cast
components
(15x15x60 cm³)

Green Innovation in Construction!

What can be
produced? 

Insulating panels made from
recycled materials &
natural/recycled fibres, ideal
for new & existing buildings

Who can benefit?

Companies seeking
recycling support &
sustainable building
material development

Advantages

Cement-free materials

Lower carbon footprint!

Use of recycled aggregates

More eco-friendly solutions!

Specialized support for
innovative recycling-based
construction!
