

BECKET BROADBAND UPDATE – August 28, 2019

In case you have not noticed, both Eversource and Verizon have begun what is called the MakeReady process, during which a pathway for the town's fiber optic cable will be created. Hopefully, the utility companies will complete their work this winter. We hope to go out to bid the network construction portion of the project this fall and begin construction in the spring, 2020. If the weather cooperates and the unforeseen problems are minimal, we hope hi speed internet service will be available in the spring of 2021.
