ACADEMIC STATIONS

LEGO Engineering using WeDo 2.0, a robotic hardware and software platform specifically designed for elementary students. Students will Connect to a story, Construct a model, Contemplate its function, and Continue improving its design. WOW!

Spanish Lighting up the brain with a native Spanish speaker.

Karate a self-defense course for young students. This is a kids favorite.

Learn to Draw creating masterpieces while learning great technique from Mark Kistler's video series.

Chemistry experiments that are fun and purposeful to teach students chemistry concepts that are age appropriate. This one is a blast! Literally a BLAST!

Reading using the best fiction and non-fiction books to boost students vocabulary and comprehension. Kids will say, "I LOVE reading."

Mental Math using Singapore's strategies and process skills to develop mental calculation. Lots of fast paced games!

Explode the Code Online, award winning series, in which students build the essential skills for reading success. Kids love using an iPad for this one.

Gymnastics, the foundation of all sports. Instruction to build incredible strength, balance, and flexibility. Let's Move!
