eDiscovery as a Service

Helping the Business Entities Deliver on Its Promise to Protect Data

Technology has a pivotal role to play in the future. DUOLARK Cyber is dedicated to bringing the best technology to bear on protecting data in order to minimize problems, developing innovative solutions to let entities in the public and private sector focus on what they do best.

Three principles guide us in this mission:

PRINCIPLE 1: Empower compliance officers and their staff. Our technology lets compliance departments, attorneys and their staffs do more themselves in less time.

PRINCIPLE 2: Automate and simplify. Our technology replaces repetitive and error prone tasks that distract from business practices. Our technology does the heavy lifting behind the scenes so what staff members experience is magic.

PRINCIPLE 3: Enable the exercise of informed legal judgment. The measure of our technology is whether it helps compliance and lawyers deliver on the promise of the law. We help provide information structure to help organizations, provide business intelligence to negotiate deals, and facts to resolve disputes wisely and justly.

Cyber Monitoring

Centralized employee monitoring and reporting

We offer you a solution to uncover Internet abuse:

- ✓ Lost productivity
- ✓ Leaking of confidential information
- ✓ Inappropriate activities by employees

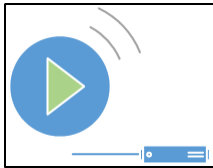

We address preventable exposure by employees regarding:

- ✓ Financial Risk
- ✓ Legal Risk
- ✓ Regulatory Risk

We deliver enterprise class functionality:

Such as remote automated deployment to monitor network devices which may require activity screening, remote management tools and the ability to record a wide range of activity including:

- ✓ Email
- ✓ Chat/IM
- ✓ Web Surfing
- ✓ Online Searches
- ✓ Keystrokes
- ✓ Screenshots
- ✓ Applications in use
- ✓ Real time ghosting

We can record and report on one or many named employees web sites visited. This includes all files transferred, all documents printed, all email activity, all chats, all instant messages and applications run and allows you to proactively control how your employees surf the web by integrating Internet Filtering.

In addition, through a surveillance-like camera recording tool, we provide context by showing you in exact visual detail what an employee does every step of the way. We have also found this to be helpful to identify the need for remedial training.

Computer, Tablet and Mobile Device Forensics

Computer device forensic services to gather and analyze records from electronic devices to help find the evidence you need to prove your case!

We have one of the most comprehensive service offerings in the industry, ranging from forensic imaging to data recovery and proactive employee monitoring services.

Below is an example of common issues we can assist you with:

- ✓ Detect, prevent and monitor for Ransomware attacks
- ✓ Illegally obtained software
- ✓ Employee productivity issues
- ✓ Cases related to sexual harassment
- ✓ Theft of company data
- ✓ Discover, monitor and record unauthorized Internet usage
- ✓ Improper new job searches
- ✓ Detection and removal of computer malware
- ✓ Recovery of deleted data
- ✓ Improper internal data use
- ✓ Pornography issues

We provide cost effective, end to end and reliable electronic evidence analysis, combining:

- ✓ Data Collection
- ✓ Processing
- ✓ Analysis
- ✓ Reporting and Testimony
- ✓ For Individuals
- ✓ For Businesses
- ✓ For Legal entities
- ✓ For Government organizations

We will also provide you with a complete digital forensics report regarding the investigation results upon the completion of our analysis. We are certified to testify in the Florida Court system.
