SKILLS

Business Accounting Software Cybersecurity | Cyberdefense Operational Security Awareness | Digital Information Security | IoT Products Security | Risk Evaluation | Cybersecurity Project Management

PROFILE

Growing up as the 3rd generation of a family-owned business based in Louisiana was a unique education. Joined the U.S. Air Force at 18 to become a cryptologist is a great story. Received an Honorable Discharge with an elevated Top-Secret clearance, and classified as a service-disabled veteran. I am an entrepreneur with start-up experiences, including Great Plains Software (now Microsoft 365 Business), Check Point Software, The MAX Group, 21BizTech and DUOLARK LLC.

EXPERIENCE

DUOLARK LLC CEO | CO-FOUNDER
April 2014– Present

MED-DETECT is more than just an EHR AI forensic and audit solution. It schedules the remediation of errors discovered. It is an ideal discovery solution for many types of digital databases. It finds untrustworthy data that may cost people their lives, and the organization new money. Artificial Intelligence is based on a proprietary inferential reference block-chain design.

Security Awareness – specializing in applying testing, auditing, digital forensic analysis, training for governance, regulations and compliance for all sizes of business.
