

# HOSHIZAKI

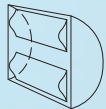

THIS IS  
HOSHIZAKI  
ICE

**Hoshizaki Ice Machines** maximize efficiency without compromising the quality. We offer clear, hard, and clean ice from machines guaranteed to last for years. Choose between **8 different types of ice** from air-cooled, water-cooled and remote air-cooled models. Versatile for any operation, our ice machines are perfect for restaurants and bars, convenience stores, hospitality industries, supermarkets, schools and universities, healthcare centers and more.

**KMEdge™ Crescent Ice**  
Crescent-shaped, individual, solid, clear

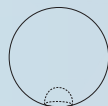

**Cubelet Ice**  
Chewable, soft, small nugget-shaped

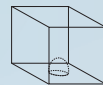

**Soft Cubelet Ice**  
Chewable, soft, mini nugget-shaped

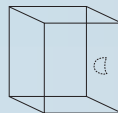

**Flaked Ice**  
Soft, light, chewable, various shapes

**Sphere Ice - 1.8\"/>**

**1by1 Ice - 1\"/>**

**2by2 Ice - 1.9\"/>**

**AM Top Hat Ice**  
Individual, solid, clear, round shape

# CRESCENT

THE MVP OF ALL ICE MACHINES

## KM|EDGE™

**KMEdge™ Crescent Cuber Ice Machines** are built for durability and longevity with a stainless steel exterior and dual-sided evaporator. From undercounter ice machines, dispensers, compact and modular, to large stackable ice machines - there is a Hoshizaki crescent cuber to fit any operation.

Modular, Stackable, Undercounter

# ICE

Hoshizaki's patented evaporator design rinses out impurities, freezing the cleanest water resulting in individual, crystal clear, clean **KMEdge™** ice.

## **Energy Efficient**

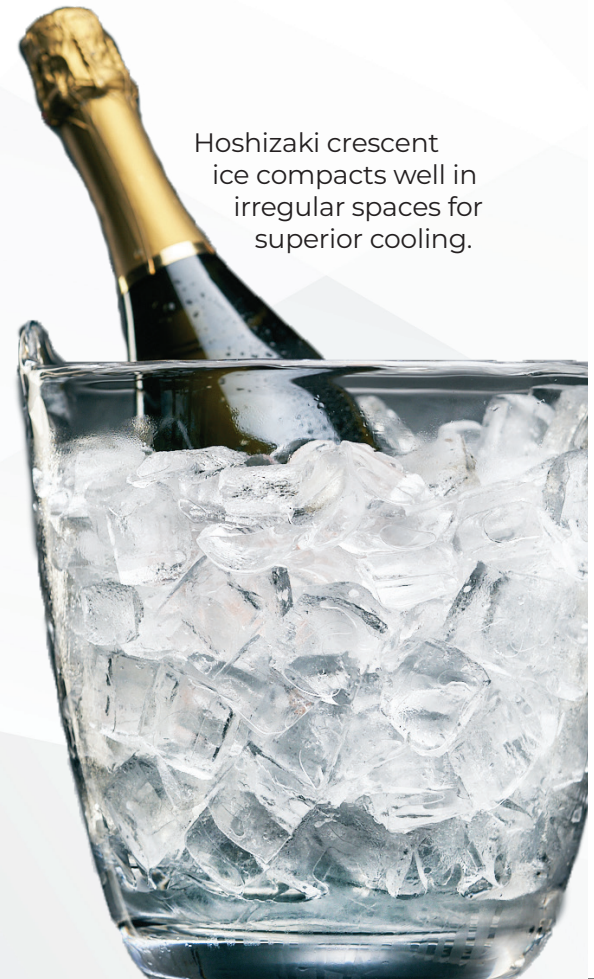

Our CycleSaver design produces the same amount of ice in half the number of cycles compared to other ice machines, resulting in a longer total product life.

## **Sanitary Components**

Removable air filters allow for easy and affordable maintenance. Sealed compartments protect the evaporator, reducing bacteria growth and cleaning frequency.

## **Dual-sided Evaporator**

Making ice on both sides of the evaporator reduces energy costs by creating the most efficient heat exchange.

Hoshizaki crescent ice compacts well in irregular spaces for superior cooling.

# CUBELET

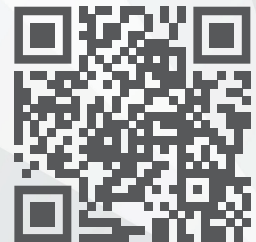

## LET ME CHEW ON IT

Cubelet ice is hard enough to dispense - yet soft enough to soak up drink flavors for long lasting enjoyment. Thanks to its quick chill time and fan favoritism, cubelet ice is ideal for a multitude of markets such as restaurants, convenience stores, offices, and healthcare.

See how the ice absorbs the drink? Are you thirsty?

Which ice type is best for you?

# ICE

## NOTHING BUT COOL SIPS

### CRESCENT AND CUBELET FOR DISPENSERS

Hoshizaki offers both cuber and cubelet ice machines for ice on beverage applications. Perfect for convenience stores, quick service restaurants, breakrooms, and more.

## SERENITY SERIES

Restaurants and convenience stores are loud. Our ice machine doesn't have to be. Our Serenity Series reduces noise, stays cooler, and is more compact than other cubers. Even better, the water tank is removable for easy dispenser cleaning.

# FLAKED

## FLAKEY BEHAVIOR

Flaked ice is relatively dry and cools more quickly than other forms of ice. This light, soft ice molds to any shape making it ideal for use in seafood displays, salad bars, healthcare, grocery stores, restaurants, and more. Ranging from undercounter options with built-in bins to back of house ice machines that provide up to 1800 lbs. of ice daily, our flaker machines are ideal for a large variety of operations.

Create a beautiful yet practical display for your culinary masterpieces.

# ICE

## THERE'S NO STRONGER AUGER

ADVANCED

CleanCycle™

### Advanced CleanCycle24

A 2-second flush of the evaporator occurs every hour to reduce impurity and mineral build up, improving sanitation and reliability.

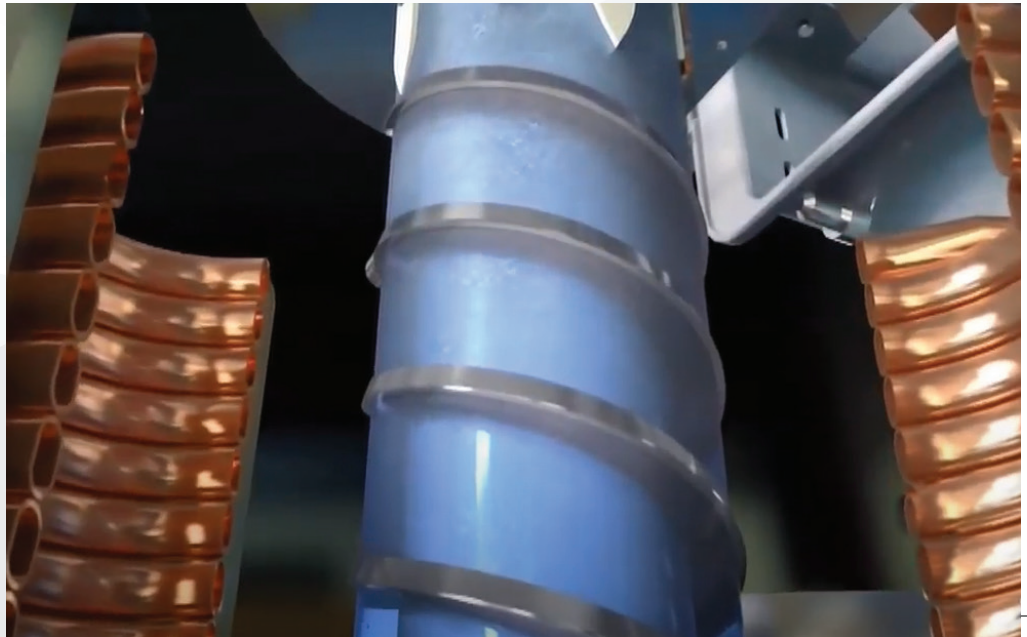

### Accessibility

Easy-to-remove panels and air filters allow for components to be easily accessed during service and cleaning.

### Stainless Steel Auger

Water-friendly and long-lasting greaseless graphite bearings in Hoshizaki's stainless steel, anti-magnetic auger help reduce mineral build-up.

# SPECIALTY

## BE THE MASTER OF YOUR CRAFT COCKTAILS

Hoshizaki's exclusive line of Specialty Ice Machines are perfect for both preparation and presentation. The 2by2 cube, 1by1 cube and sphere ice machines fit easily under a bar, eliminate the need for ice molds and ice vendors, and help you create stunning cocktails while increasing your revenue per drink.

# ICE

*Creative Cocktails*   
**HOSHIZAKI** SPECIALTY ICE

## **2by2**

The 2by2 ice machine fits neatly under a bar and produces dramatic 1.9"x1.9"x2.3" blocks of ice for cocktails and spirits.

## **1by1**

Perfectly versatile, the 1by1 cube is great for shaking, stirring, and serving all types of beverages from tea to whiskey.

## **Sphere**

Swivel these 1.8-inch spheres in a mixing vessel, use them to whip egg whites in a shaker or serve with a straw, and garnish for a picture-perfect presentation.

# ICE & WATER

## HYDRATION MADE EASY!

Options include hotel and countertop dispensers and cubelet ice & water dispensers. Each line comes in a variety of ice production and storage capacities to best fit your operation - be it a small office breakroom or a busy high-rise hotel.

OptiServe machines are easy, touchless, and ideal. For sanitary use in breakroom areas, lobbies, nursing stations, cafeterias and more - Hoshizaki's DCM dispensers can sit on top of a counter or stand for additional storage.

# DISPENSERS

## WATER HOW YOU WANT

**Hoshizaki's MODWater** dispenser is a powerful way to solve big hydration needs with a smaller carbon footprint. Its patented in-line carbonation technology allows it to be packaged within an attractive, modern design. Chilled, sparkling, hot, and alkaline water are all available at the touch of a button!

**MORE CHOICE**

**LESS WASTE**

**SAVES MONEY**

**MORE EFFICIENT**

Bottled water is thousands of times more expensive than tap water.

Compare an average of \$0.002 per gallon for tap water to \$0.89 to \$8.26 per gallon for bottled waters.

5 gallon water jugs are unsightly and occupy valuable space.

# BINS, STANDS

IT CAN'T BE STORED ON THE CLOUD

B-1550SS

B-250SF

**Hoshizaki Ice Storage Bins** provide a safe, sanitary storage solution for cubed or flaked ice. These bins are designed for side-by-side or stacked installations with our ice machines and feature stainless steel exteriors for a sleek, easy-to-clean and durable look. The complimentary ice scoop comes with H-Guard Plus Antimicrobial Agent protection.

**Hoshizaki Stands** for ice machines, DM, and DCM dispensers are made of heavy duty stainless steel which is corrosion resistant and easy-to-clean. Locking doors come standard.

# & ACCESSORIES

## ACCESSORIZE, ACCESSORIZE, ACCESSORIZE

### Water Filters

Let Hoshizaki's water filters give you the peace of mind that your water is the best it can be. High-quality water will keep your equipment running smoothly, maximize efficiency, and improve drink taste.

### EcO<sub>3</sub>Ice

The compact EcO<sub>3</sub>Ice ozone device kills bacteria, yeast, and mold in the ice-making process, reducing biofilm buildup and cleaning frequency. With each cycle, EcO<sub>3</sub>Ice creates a small, safe, and effective amount of pure ozone - nature's sanitizer - continuously treating the machine's interior, storage bin, dispenser, and drains.

The **Fastcomm** gateway provides real time email and text monitoring, 2-way control and valuable insights into the health of your ice machine. Save money by empowering your technicians to diagnose issues before they arrive on site. Our plug and play solution can be easily installed on all Hoshizaki cubers.
