**How to take a photo for your Custom Silhouette Portrait (Example Below)**

Tip #1: Have your camera/phone height at your subjects ear level (above or below ear level can distort features)

Tip #2: For PETS, adjust your camera height to capture best side view.

Tip #3: Have your subject in front of a light solid background.

Tip #4: Have your subject look straight ahead, chin up, closed mouth/relaxed expression looks best.

Tip #5: Take photo straight at their side for a profile view. Capture entire head, hair and neck.
