Because security is no game, we innovate and incorporate the latest technologies into our products.

 **TriboTek.** The patented woven design gives extra traction on ice and snow optimizing the effect of the tribologic law of physics.

 **HTS, High Tenacity System*.** ISSE Safety engineers and manufactures its own fibers in Spain. The HTS is the result of years of R&D. These extra resistant fibers are also used on off shore oil platforms.

 **NanoTek.** A nanotechnology that "traps" certain molecules responsible for the bad smell and the development of bacteria.

 **HybridTrak.** This technology combines the Tribologic traction effect with the mechanical traction from spikes. For improved grip in icy conditions.

 **Activ3D.** Specific 3D braiding that provides longer lasting and better grip in deep snow conditions.

La seguridad no es un juego. Por eso, innovamos e incorporamos las últimas tecnologías en nuestros productos.

 **TriboTek.** El diseño patentado del trenzado proporciona una tracción adicional en hielo y nieve optimizando el resultado de la ley física de tribología.

 **HTS, High Tenacity System*.** ISSE diseña y fabrica sus propias fibras en España. HTS es el resultado de años de I+D. Estas fibras ultra resistentes son utilizadas en plataformas petrolíferas.

 **NanoTek.** Una nanotecnología que desactiva algunas moléculas responsables del mal olor y del desarrollo de bacterias.

 **HybridTrak.** Este sistema combina el efecto tribológico de agarre con la tracción mecánica de los picos.

 **Activ3D.** Un trenzado 3D específico que proporciona una mayor durabilidad y un mejor agarre en condiciones de nieve profunda.

ISSE Tribologic

Textile cover for tires. It provides safety and traction in extreme driving conditions.

- It is a **patented product**. It is certified by Onorm 5121, B26 and approved by the Washington Department of Transportation.
- **Very easy to fit** especially when compared to standard metallic snow chains, and when taking into account the extreme conditions of use.
- **No risk of damaging the car** (ABS, EPS, ETC), nor the tires and roads.
- **No vibration**, compared to when using metal snow chains, which results in better driving conditions.
- **Easily stored** in the boot of the car. Washable.

ISSE provides two specific important advantages thanks to the innovative design of its snow socks.

- 1- The various combinations of wheel diameter, tire profile and width are taken into account in a way that **less ISSE snow socks sizes are needed in order to fit the entire range of tires**.
- 2- They work in a way that they are **automatically and perfectly centered** on the tire after a very short while of use. It is impossible that they fall off while driving under normal conditions.

Fit to all tire sizes for cars, SUV, 4 wheel drive, buses, truck and industrial machinery:

- 4 different models for car, SUV, minivans and 4 wheel drive. Available in 6 sizes that fit the entire range of tire present in the market.
- 1 model for Trucks and Buses available in 11 sizes (fits to any tire size in the market).

Funda textil para neumáticos que proporciona seguridad en condiciones extremas de conducción.

- Es un **producto patentado**, certificaciones Onorm 5121, B26 y Departamento de Transporte de Washington (WDT).
- Son mucho **más fáciles de colocar**, sobre todo teniendo en cuenta las malas condiciones que suelen darse cuando se hace necesaria su utilización.
- **Ningún riesgo de dañar otros elementos** (ABS, EPS, ETC) tampoco a los neumáticos ni a las carreteras.
- **No producen ninguna vibración** ni el golpeteo característico de las cadenas metálicas, que resulta tan molesta para los ocupantes del vehículo y perjudicial para éste.
- **Mayor facilidad de transporte** en el maletero del vehículo.

Gracias al innovador diseño de las cadenas textiles ISSE, **se consiguen dos importantes ventajas adicionales**.

- 1- Las distintas combinaciones de diámetro de llanta, perfil del neumático y su anchura se compensan, de modo que **bastan pocas tallas de fundas para cubrir la práctica totalidad de medidas de neumáticos existentes**.
- 2- Tienen un **comportamiento auto-centrante**, de modo que quedan perfectamente centradas después de rodar unos instantes y se hace imposible que se salgan de las ruedas.

Cobertura muy amplia, incluyendo la práctica totalidad de ruedas para, turismos, furgoneta, todo terreno, autocar, camión y maquinaria:

- 4 modelos diferentes para turismos, furgonetas, camionetas y 4x4, disponible en 6 tallas que cubren todos los neumáticos.
- 1 modelo para vehículos industriales (camiones y autocares) disponible en 11 tallas que cubren todos los neumáticos.

Made in Spain

CLASSIC

For occasional use or emergency when severe snow falls. For cars, SUVs, minivans and four wheel drive.

No deterioration when used on snow and icy conditions and the maximum speed below 40 Km/h (25 mph). Driving on asphalt will shorten socks lifespan.

Composition: 100% polyolefin.

Reusable and washable .

100% Made in Spain.

Recomendada para uso esporádico o de emergencia. Para turismos, furgonetas, camionetas y 4x4.

Pensadas para utilizarse sin deterioro alguno en superficies con nieve y hielo, a condición, naturalmente, de mantener una velocidad máxima de 40 Km/hora y no circular fuera de carreteras asfaltadas.

Composición: 100% poliolefina.

Reutilizable y lavable .

100% fabricado en España.

SUPER

For intensive use in snow and icy conditions. For cars, SUVs, minivans and four wheel drive.

Designed to be used without deterioration even when driving on mixed areas of snow/ice and asphalt. No need to take the covers off till the end of the slippery area. To be used only at the maximum speed of 40 Km/h (25 mph). Not to be used on roads without asphalt.

Composition: 100% highly resistant polyester.

Reusable and washable .

100% Made in Spain.

Recomendado para uso intensivo. Para turismos, furgonetas, camionetas y 4x4.

Están especialmente pensadas para poder utilizarse sin deterioro alguno en las circunstancias de alternancia de nieve y asfalto, sin necesidad de retirarlas hasta que finaliza totalmente la superficie deslizante. A condición, naturalmente, de mantener una velocidad máxima de 40 Km/hora y no circular fuera de carreteras asfaltadas.

Composición: 100% poliéster de alta resistencia.

Reutilizable y lavable .

100% fabricado en España.

- MINIMUM ORDER ONE BOX PER SIZE

PROPERTIES:

- FOR CARS, VANS , PICKUPS ,SUV AND 4X4
- **100% SPANISH MANUFACTURING** (Both the product and as well as all components)
-

PRODUCT ADVANTAGES:

- They are much easier to place
- Do not cause any damage to the tires
- Do not produced at all, vibrations or knocking characteristics of metal chains
- Improved ease of transport in the trunk of the vehicle
- Our chains ISSE are specially designed to be used without any deterioration in the circumstances of alternating ice and snow, as well as alternating sections of asphalt without removing them.
- Only 6 sizes we cover 100% of tires, including passenger cars, van, SUV pickups and 4x4

TRUCK & BUS

Recommended for any type of use on snow and ice. It is the only textile chain in the market for trucks and buses. With 11 sizes, it covers the entire tire range.

No deterioration when used on snow and icy conditions and the maximum speed below 30 Km/h (20 mph). Driving on asphalt will shorten socks lifespan.

Composition: 100% highly resistant polyester.
Reusable and washable .
100% Made in Spain.

Recomendada para uso normal. Es la única cadena textil en el mercado para camiones y autocares, con 11 tallas abarcamos todos los neumáticos.

Pensadas para utilizarse sin deterioro alguno en superficies con nieve y hielo, a condición, naturalmente, de mantener una velocidad máxima de 30 Km/hora y no circular fuera de carreteras asfaltadas.

Composición 100% poliéster alta resistencia.
Reutilizable y lavable .
100% fabricado en España.

SNOW SOCK

PREVOST
THE ULTIMATE EXPERIENCE

INTRODUCING THE SNOW SOCK

PROVIDE SECURITY DRIVING IN EXTREME SITUATIONS

- No risk of damaging body panels and other items when compared to snow chain failures.
- No vibrations when driving compared to snow chains.
- Drivers no longer have to wrestle with heavy snow chains.
- Max speed 30 KM/H (20 MPH).
- Can be used on PrevoSt and 9700 coaches.
- Easy to install in just a few minutes compared to traditional snow chains.
- Comes in a handy storage bag with gloves.
- Washable and reusable.
- Light weight design makes it easy to assemble, transport and store.
- Add traction to your tires improving your vehicle's stability.

PROPERTIES

For trucks and buses.

100% SPANISH MANUFACTURING (Both the product as well as all components).

PRODUCT ADVANTAGES

- They are much easier to place.
- Do not cause any damage to the tires.
- Do not produce at all, vibrations or knocking characteristics of metal chains.
- Improved ease of transport in the trunk of the vehicle.
- Our chains ISSE are specially designed to be used without any deterioration in the circumstances of alternating ice and snow, as well as alternating sections of asphalt without removing them.

COMPOSITION: 100% POLYESTER

CASE MEASURES: 38x22x8 cm.
