

SUPPLY CHAIN MANAGEMENT FOR NGO's (SCM)

Course Objectives:

1. Procurement Definition and Fundamentals:

- Understand the core concepts of procurement and its role in organizational success.
- Learn key procurement terms and their significance in supply chain dynamics.

2. Disaster Preparedness and Planning:

- Explore the importance of disaster preparedness in procurement.
- Develop effective disaster response plans to mitigate supply chain disruptions.

3. Procurement Policies and Practices:

- Understand procurement policies and practices.
- Develop and implement robust procurement strategies aligned with organizational goals.

Course Objectives:

4. Procurement Tools:

- Familiarize yourself with a variety of procurement tools and software.

5. Inventory and Assets Management:

- Understand the principles of inventory management and asset tracking.

6. Utilize Technology in Supply Chain Management:

- Explore the integration of technology in supply chain processes.
- Gain practical skills in utilizing technology to streamline procurement operations.

7. Data-driven Decision Making:

- Learn the importance of data in supply chain management.
- Develop skills to analyse and interpret data for making informed procurement decisions.

Training Approach:

This training program is designed to be highly practical, mirroring real-world procurement scenarios. Participants will engage in hands-on exercises and case studies to apply theoretical knowledge to practical situations. Emphasis will be placed on the integration of technology and data-driven approaches, ensuring that participants are well-prepared to face the challenges of modern procurement and supply chain management in their professional roles.

Assessment

Participants will be evaluated through practical exercises, case studies, and a final project that simulates a real procurement scenario. This approach ensures that participants not only grasp theoretical concepts but also acquire the practical skills necessary for success in their procurement roles
