**K
R**

Hello and welcome to our 17th annual production sale. We first want to thank our past buyers for their confidence and support of our program, we are grateful for the support and friends we have made being in this business.

As you can see, we have transitioned to selling age-advantaged bulls this year. As we looked to the future of our program, we recognized it was time to make changes to become more efficient with less labor force. With this in mind, we have decided to move our calving date back to align with our commercial herd, which will also shorten our calving season.

The bulls were run on grass over the summer and were brought into the lot on Sept 15th. Since then, they have been fed a complete mixed ration consisting of chopped hay, silage, corn, distillers and a complete mineral program. The bulls did not have creep feed. We always try to grow the bulls and not push them.

We take pride in representing our cattle honestly, absolutely no “fluffed” numbers or information. We believe in trying to breed the most balanced and functional cattle possible, so we do not chase any one individual trait. All the bulls are semen tested, soundness evaluated and have genomic-enhanced EPDs.

The bulls are ready to go to work for you. As we transitioned to this first offer of age advantaged bulls, we were looking for a way to make sure that we did not skip a sale and to provide our customers with what they have come to expect from our offering without sacrificing quality. We didn't want to simply dig deeper into our bull pen, so we worked with our friends at TNT Simmentals to acquire some extra, high-quality bulls to help provide a strong offering for both the 2025 and 2026 sales. We feel this allowed us to offer some of our top-end bulls in both sales, as well make both offerings as balanced as possible before having our full force bull crop available in 2027. If anyone has questions about how we are moving forward, we would

love to visit about how we can continue to offer you the quality you have seen in our program at a more developed age, which we feel will offer extra advantages to our customers.

We encourage you to view the bulls at the ranch any time before the sale. We also will hold an open house on Saturday, January 31st from noon to 5 p.m. This year's sale will be completely online only at DVAuction.com. If you are unfamiliar with this format, please call and we will help explain and can help get you set up to bid, as you will have to be approved in order to bid. Also, visitors to the ranch to view the bulls will be entered into a drawing to receive a \$500 sale credit. If you are unable to come to view the bulls, give us a call and we would be happy to talk over the bulls to help you find the best options to fit your individual needs. Videos of each bull will be available for viewing on dvauction.com or our website crosshairsimmental.com. This year again, we will have some of our great customers offering some excellent top-end commercial heifers. The heifers will be at each individual ranch and can also be viewed there, so be sure to check them out as well. We invite you to come and see for yourself how a bull from CHSR can add pounds to your calf crop and improve your profitability.

Thank you for your interest and support.

Ben, Cassie, Brinley, Hailey, Jaxson, Jace, Colton and Bodey Kleppe

Cattle Viewing:

Bulls can be viewed at the ranch any time prior to the sale. We will be hosting a special open house to view the bulls on Saturday, January 31 from Noon to 5 p.m. at the ranch. Visitors to the ranch prior to the sale will be entered into a drawing for \$500 sale credit to be drawn prior to the sale. Being the auction format is a video-only sale, we highly recommend coming to evaluate the bulls prior to sale time.

Online Bidding:

The sale will be held on DVAuction.com in an online only bidding style. The sale will open to bidding February 1st and conclude on Feb 4th at 6 p.m. Bidding will extend 3 minutes on all lots for each bid past 6 p.m. until no other bids are received. Prior approval from DV Auction is required in order to bid, so please plan ahead.

Terms and Conditions:

Bulls are to be paid for by cash or check at the conclusion of the sale. All buyers will be mailed an invoice to be paid as soon as possible. No animals will leave the ranch without payment. Any changes to the catalog will be posted on DVAuction and our website prior to the sale. All cattle sell under the terms and conditions of the American Simmental Association.

Delivery

Bulls will be delivered around March 1st. Any bulls that are picked up within a week of the sale will receive a \$100 credit per bull towards their purchase price. Please notify us upon purchase if you plan to pick up your bulls. All bulls must be paid for in full before leaving CHSR. We offer free delivery within 250 miles of our ranch, and we will work with the buyer to arrange the most cost-effective delivery for distances beyond 250 miles.

Genomic-Enhanced EPDs:

All of the bulls selling in the sale will have Genomic Enhanced EPDs and have been parent verified to sire. We believe GE EPDs provide you with the most accurate EPDs possible.

Guarantee:

CHSR guarantees to provide you with a bull that has passed a semen and soundness evaluation by the Steele Vet Clinic prior to

the sale. If a problem arises with your purchase, CHSR must be notified before Sept 1, 2026. After notification of issue, CHSR has 90 days to make an adjustment of said problem. It is the buyer's responsibility to return the bull to CHSR at the buyer's expense. If the bull is declared unsatisfactory by the Steele Veterinary Clinic, the buyer will be provided with a bull of equal value, if one is available, or given credit (minus salvage value) towards the purchase at a future sale. We will do everything we can to make any situation satisfactory for our customers. We recommend insuring your bull in the case of an unexpected fatality or issues out of our control, as they become property of the new owner at the conclusion of the auction.

Bull Development:

Bulls have not been creep fed. They were developed on pasture as yearlings until September 15th. We worked with Joel Ostendorf of CHS nutrition to provide a balanced mixed ration of corn, dry distillers, chopped hay, corn silage along with complete liquid mineral package that allows them to develop without sacrificing their longevity.

Volume Discounts:

We will be offering the following volume discounts on purchases of bulls:

3 bulls - 3% off total purchase

4 bulls - 4% off total purchase

5 or more bulls - 5% off total purchase.

Directions to CHSR:

10 miles South of Dawson off I-94 on Highway 3 to 48th St. and 1 mile West.

15 miles North of Napoleon on Highway 3 to 48th St. then 1 mile West.

Simmental Guide to EPDs

Courtesy of the America Simmental Association. **For more information on EPDs, visit simmental.org.**

CE Calving Ease – predicts the ease with which a bull's calves are born to first-calf heifers or mature cows. Larger number indicates higher percentage of unassisted births for calves sired by this bull.

BW..... Birth Weight – predicts the difference in average birth weight of a bull's progeny compared to other bulls.

WW Weaning Weight – predicts the difference in average 205-day weight of a bull's progeny.

YW..... Yearling Weight – predicts the difference in average 365-day weight of a bull's progeny compared to other bulls.

MCE Maternal Calving Ease – The ease with which a sire's daughters calve as first-calf heifers or mature cows. Larger number indicates higher percentage of unassisted births for calves born out of this sire's daughters.

Milk Milk – predicts the milking ability of a bull's daughter. A positive value indicates above average milking ability.

MWW Maternal Weaning Weight – predicts the weaning weight of a bull's daughter's calves in pounds. A positive value indicates higher-than-average weaning weights.

CW..... Carcass Weight – predicts the difference in average hot carcass weight. A positive number indicates heavier-than-average carcass weights.

REA Ribeye Area – predicts the average difference in ribeye area between the 12th and 13th rib of an animal's progeny. Express in sq. inches.

MARB .. Marbling Score – A subjective evaluation of the amount and distribution of intramuscular fat (IMF) measured between the 12th and 13th rib. A positive value indicates higher-than-average marbling.

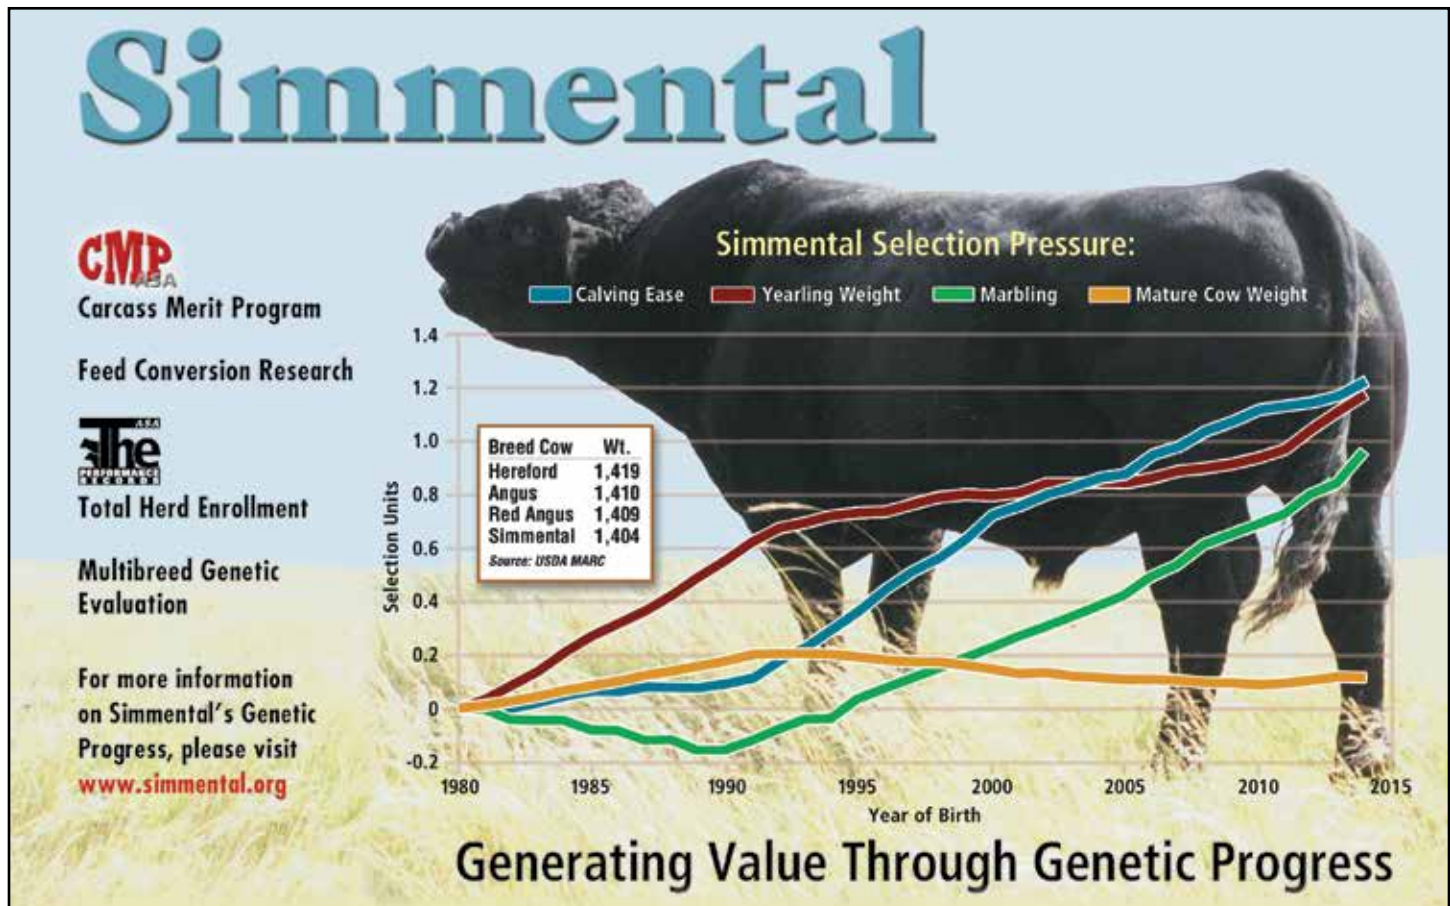

BF or FAT Backfat – predicts the average differences between an animal's progeny in external fat thickness at the 12th and 13th rib. Express in inches at a given age endpoint.

YG Yield Grade – predicts the average differences in cutability and is expressed as a deviation. A negative or lower value is desirable just as a lower Yield Grade is desirable.

STAY Stayability – predicts the probability that a sire's daughters entering the herd will stay in production through 6 years of age. A higher value indicates greater stayability.

API All-Purpose Index – Evaluates sires for use on the entire cow herd with a portion of their daughters required to maintain herd size and the remaining progeny put on feed.

TI Terminal Index – Evaluates sires for use on mature Angus cows with all offspring put on feed. Maternal traits are not considered in this index.

DVAuction

Broadcasting Real-Time Auctions

www.DVAuction.com • Watch & Bid Online for FREE!

DVAuction ONLINE-ONLY Auctions

How they work:

This means that bidders will be able to preview the lots online with complete information, including their pedigree, EPDs and possibly a video, for several days prior to the sale. During that time, bidders can leave a maximum bid which the system will represent confidentially up to that amount. Bidders can also bid incrementally as the bid advances prior to the close.

All lots will close at the same time. Bidding will be extended if a bid is placed on any lot near the closing time. Bidding will officially close when there are no bids placed within a 5-minute period of time.

For general questions, please contact our office:

(402) 316-5460 or support@dvauction.com

*High-speed internet access required.

- His dam has a WW ratio of 105 on 6 calves

Lot numbers 33 through 40 are bulls bred and raised by TNT Simmentals.

Over the past few years, we have acquired many new herd sires from TNT. We purchased some embryos and, in the fall of 2024, we purchased a set of top-end bred cows from them as well. We have been very impressed with the TNT program and will continue to utilize their genetics in our program moving forward.

As part of the process of transitioning to age-advantage bulls in 2026, we were looking for ways that we could do this without skipping our 2025 sale for our loyal customers, while still aiming to maintain the quality our customers have come to expect from CHSR.

In conversation when purchasing the cows from TNT, we were given the opportunity to pick some bulls off the ranch, out of their program, that we felt would fit well with what our customers have come to expect from CHSR bulls. We know our customers will be pleased with what they have allowed us to choose and offer to you. These bulls were developed at TNT until March 1, 2025, and have since been at our ranch. Therefore, they are not indexed with our bulls. They also did not have any creep feed. They are semen tested and ready to go to work just as our own bulls are.

At CHSR, we will guarantee these bulls the same as we do our own, and any issues or problems that may arise, do not hesitate to contact Ben. We would like to thank TNT Simmentals for allowing us this unique opportunity to help us through this transition and helping us meet our desire to provide top-end, consistent quality for our customers.

- Homo Polled and Hetero Black
- A thick-made, deep quartered bull with an excellent disposition, with top 5% Doc, top 10% BW and top 15% CE while indexing 108 for WW
- His dam is a typical Imperial daughter, broody made with an ideal udder and the cow family runs generation deep with calving ease. We feel comfortable with recommending him for use on heifers

THE PROFIT PREDICTOR

BUILD A HERD THAT WORKS AS HARD AS YOU DO.

The American Simmental Association's \$All Purpose Index, or \$API, considers the cow herd while keeping pressure on terminal traits. And data from the last 25 years show it's working.

ALL PURPOSE. ALL YOU NEED.

BUILD A HERD THAT WORKS AS HARD AS YOU DO.

**STAND STRONG
SIMMENTAL**

The American Simmental Association's \$All Purpose Index, or \$API, predicts cow herd profitability while keeping pressure on terminal traits. Better genetics translate to increased profits for bulls used to sire replacement heifers and harvest remaining calves.

60 Head Commercial Simmental/Red Angus Heifers

Karen Mutschler or Jeremy Hoff, Eureka, SD 605-281-0055 or 605-281-0257

These heifers are January through March born calves that have been on a full vaccination program with four rounds of shots at birth, pasture turn out, pre weaning and at weaning.

In December they were bangs vaccinated, pelvic measured, checked open and breedable. They were given Bovi shield gold FP5/VL5 type A shot and EID bangs tags by Dr. Cassie Holtz from the Bowdle Vet Clinic.

They have never had creep feed and have been on a 45 mega cal ration, salt blocks and were given safeguard dewormer in November. On sale day the heifers should be averaging around 750-800 pounds. These heifers are backed by a long line of Crosshair Simmental genetics as well as other reputable breeders and 30 plus years of AI breeding.

We have a shot record, pelvic measurements and Neogen DNA data available upon request. Due to our calving work load in February and March the heifers will remain at the ranch free of charge and will be available to pick up March 15th- April 1st. After April 1st feed and yardage cost will be added. We ask that the heifers be paid for in full within 10 days of the sale via check or wire transfer. Please contact us with any questions or to view the heifers.

70 Head Commercial Red and Black Simmental/Angus Heifers

Terry and Landon Harpole, Dawson, NDTerry: 701-391-3758 or Landon: 701-426-5847

These heifers are the top pick of our 2025 heifer crop. They were picked out of 250 heifers and were chosen by maternal, disposition and longevity characteristics. The heifers were given Inforce 3, One Shot BVD, 7-Way with Somnus and Pinkeye shots on June 1st. Then on November 21st they were boosted with Bovi Shield Gold 5, Somubac and poured with Cleanup.

Before delivery they will be checked open and breedable, Bangs vaccinated, given Cattlemaster VL5 and poured with Cleanup. These heifers have been on a 44 mega cal ration since December and have never had creep feed or implants and are carrying no brands. The heifers will be weighing around 700 pounds. These heifers are all April-born calves and have heavy influence of Crosshair Simmental genetics along with AI breeding and should make a great set of cows.

We are offering free delivery within 150 miles of Dawson, ND. We would like the heifers to be delivered or picked up by the 20th of February. Payment should be made via check or wire transfer within 10 days of the sale.
