EY

Greeting from Huber EY Red Angus,

Welcome to our 2022 sale. We have been raising Red Angus cattle for the past 25 years and our focus remains the same. We want to produce balanced traits that work for not only ourselves but our customers as well. Mothering abilities, docility, foot structure, growth, positive carcass traits are at the top of this list.

We feed everything here at the ranch and use a TMR wagon allowing us to manage a higher roughage ration. The rations are balanced by our nutritionist Joel Ostendorf, of CHS, and consist of alfalfa, slough hay, upland hay, hay barley, corn silage, dry DDG, corn and a mineral supplement. The only creep feed the bulls receive is a Coccidia pellet in the spring before turnout. They are raised on their own dams, and weaned early October at our ranch. Our goal is to develop the bulls responsibly and feed for a 3lb/ADG.

Our cowherd and herd sires have all been 50K DNA tested for genetic and parentage assessment. We feel confident that this will provide you with the most accurate numbers when making your selections.

The bulls have all passed their first semen exam by Dr. Galbreath, Edgeley Vet Service on March 24. They have also received a foot rot shot. We do recommend having them tested again before turn out.

Hours and hours go into raising these cattle every year and breeding to improve them. As cattlemen you know and understand this, but we couldn't get it all done without the help of our kids and hired help, Joe and Garrett. Thanks to them and all the other individuals that play a role in helping us throughout the year.

We look forward to working with past and future customers and continue to stand by the cattle we raise. Feel free to visit or ask questions about our herd anytime.

KR

Hello and welcome to our annual production sale.

We first want to thank our past buyers for their confidence and support of our program, we are grateful for the support and friends we have made being in this business.

The bulls have been fed a complete mixed ration consisting of chopped hay, silage, corn, distillers and a complete mineral program. The average daily gain test started the day of weaning on October 17th and continued for 104 days. We take pride in representing our cattle honestly, absolutely no "fluffed" numbers or information. We believe in trying to breed the most balanced and functional cattle possible. We do not chase any one individual trait. All the bulls are semen and soundness evaluated and are ready to go to work for you.

We are excited for you to see the bulls, we try to bring a consistent offering from end to end for you to appraise. They are bred to grow and fed to last in anyone's program. This year we again are offering a few more black bulls, by utilizing embryo transfer and artificial insemination we are hoping to bring some high quality black genetics for our customers that utilize both black and red genetics. We would like to thank our friend Kipp Julson from Double J Simmentals for allowing us to put some embryos in to help speed up the process of getting some quality black genetics as well.

We would like to invite you to take the evening off and join us on April 29, 2022, at 5 p.m. at Napoleon Livestock. If you are unable to attend the sale we encourage you to view the bulls at the ranch any time before the sale, or give us a call. We also have Steve Engel available to be another eye for anyone who can't make it to the sale, he has been through the bulls has a good eye for cattle. You can reach him at 605-845-4915 and we can help select a bull to fit your needs and program. This year we have videos of the offering available online on DVAuction.com or our website crosshairsimmental.com.

We hope to see you at the sale and see for yourself how a bull from CHSR can add pounds to your calf crop and improve your profitability. Thank you for your interest and support.

Thank you for your interest and support.

Ben, Cassie, Brinley, Hailey, Jaxson, Jace and Colton Kleppe

Kuhn's Red Angus

James, Stephanie Kuhn
Elodie, Reagen, Hudson, Brock & Kyah Kuhn
6962 28th Ave SE
Napoleon, ND 58561
Home: 701-332-6378
Cell: 701-426-6921

Thank you for your interest in our 28th year, it means so much more to us than we can express.

We have been doing a lot this year, and feel it is important to keep you updated. Recently we have DNA and parent verified our whole cow herd along with the bulls in the sale. Meaning you will know that not only the bull you purchase is out of that sire, but he is also out of the dam in the catalog, and she is verified to who she is. We believe that you should know that the genetics you are buying is what you are getting!

Also, we DNA enhanced the EPDs. By doing this it will give you a more accurate picture of what you are buying. There have also been enhancements in the ET side of things as well, so you will also see more ET sons in the sale. Which gives you the ability to turn out full brothers into your cow herds.

We have also been doing a lot this year as a family. So let me get you caught up on the kids.

Kyah is the youngest and definitely the baby of the family. She is 5 right now and is turning 6 in late fall. She loves playing with the dogs or cats and really enjoys exploring the farm with Brock and Hudson. She does enjoy playing with her older sisters but has a real connection with her brothers. However, she doesn't have as much time for that now since she started preschool in Wishek and will be going to kindergarten next year.

Brock is the next in line, at 7 and about to turn 8 in the fall. He really has enjoyed 1st grade so far, but he is excited for school to be over so he can be home. When he is at home, he always wants to help his dad. Whether it would be opening gates or driving a tractor he always wants to do it. He also enjoys planning what Grandma Irene and he need to do on the farm for the summer.

Hudson is the oldest boy at 10. He is just about done with 4th grade and is really excited to stay home and help out. He was in elementary boys basketball this year and has really enjoyed it. I think it was more of the fact he got to stay at Grandma Irene's overnight, though. He enjoys being outside whether it's helping dad

feed, playing with the cats and dogs, or just exploring and climbing things.

Reagen is the second oldest at 12, and loves to play with her younger siblings all the time. Which she is really good at. Reagen is in Elementary Volleyball right now and likes to practice with her older sister Elodie. She enjoys spending time with her new show heifer Mazequine, who also happens to be an ET. She would like to show her in the Tri County fair this summer, and I have no doubt that she will. Whatever that girl sets her mind to she will achieve, which is one of the many things I love about her.

The last kid I have yet to talk about is Elodie, a.k.a me. I am the oldest at 13 and about to turn 14 this spring. I just went to FFA state for livestock judging and got gold. Now that FFA is over I am starting drama and speech. I have also just started Track, where I throw shot and disc. I do save time for cattle though and am an active member in NDJRA (North Dakota junior Red Angus) and have the position of historian. I also show Red Angus bred heifers at the Tri County fair, this year I am showing Opal. Her #ID is J036, and her sire is Promotion.

Thank you for your support in our programs,
James, Stephanie Kuhn • Elodie, Reagen, Hudson, Brock and Kyah

SALE ORDER:

The bulls will be sold by a sale order that we will put together sale day.

CATTLE VIEWING:

Prior to April 28, Kuhn's Red Angus bulls can be viewed at the farmstead 7 miles south of Napoleon on Hwy 3, 3 miles west then 1/2 mile north.

Top Dollar Angus Feeder Calf Program

Promote Your Verified Genetic Investment

Top Dollar Angus is the industry leader in third-party genetic verification and marketing assistance for superior Angus and Red Angus-based feeder cattle. Our program stamps a unique identity on the 'best of the best' by verifying and then showcasing their genetic merit. The Top Dollar Angus team works directly with a large number of feedyards and buyers to provide them with documented superior feeder cattle, coupled with genetic risk mitigation and the precision understanding they need to pursue your cattle with absolute confidence.

Top Dollar Angus enables cow-calf producers to benefit from the genetic value already built into their herds. Producers that invest in high-end genetics, as well as strong health and nutrition programs, need a means of positively differentiating their calves from average cattle. Top Dollar Angus does that. Industry demand is strong for genetically superior feeder calves with the right supporting documentation. Don't make buyers guess, let them know by putting the Top Dollar Angus badge of honor on your premium genetic investment.

BREEDING GUARANTEE:

Kuhn's Red Angus, Crosshair Simmental and Huber EY Red Angus guarantee to provide you with a sound breeding bull capable of passing a semen test at 14 months of age.

If a problem arises, the seller must be notified before Sept. 1, 2022. After notification of issue, seller has 90 days to make an adjustment of said problem. It is the buyer's responsibility to return the bull to the seller at the buyer's expense.

If the bull is declared unsatisfactory, buyer will be provided with a bull of equal value or credit given towards the purchase of another bull, seller's choice.

At no time will seller be responsible for more than the purchase price of animal.

Kuhn's Red Angus, Crosshair Simmental and Huber EY Red Angus will do everything possible to make any problem that arises, satisfactory to buyer.

Kuhn's Red Angus, Crosshair Simmental and Huber EY Red Angus strongly encourage taking insurance on your purchases.

TERMS AND CONDITIONS:

As soon as any animal is sold, it becomes the responsibility of the purchaser. We will discount \$50 per bull taken home by the customer on sale day. After May 1, a \$2.50 per-day feed cost will be charged.

All sales are in the U.S dollar. Each animal is to be sold to the highest bidder. The auctioneer shall settle any disputes as to bids.

All cattle are to be paid for by the purchaser during or immediately after the sale and will not be removed until after settlement has been made unless prior arrangements have been made with Kuhn's Red Angus, Crosshair Simmental or Huber EY Red Angus.

Napoleon Livestock would like the animals removed from their facility as soon as possible.

ONLINE BIDDING:

If you can't attend the sale, real-time bidding and live internet broadcast is available through DVAuction.com. Please see the below instructions on registering and bidding.

Buyers — View the bulls ahead of time at our ranches and receive a \$100 sale credit!

Watch and Bid Online at DVAuction.com

Can't make the sale?

We are pleased to bring you real-time Internet bidding and a live broadcast of this sale through DVAuction. To watch or bid online, simply complete the following steps:

- Visit the DVAuction web site at www.dvauction.com
- Click on the "Creat New Account" tab
- Enter a user name, password and your contact information.
- Complete the Banking Information. (If you are only interested in viewing you can skip this section)
- Select your Time Zone, Accept the Terms and Conditions and click "Create Account"
- Complete the process by answering a few questions, selecting your subscription choices
- Click on "Apply for Bidding" in the upper left corner of your screen to select the sales you wish to bid on
- Be sure to include a personal contact at your bank, we will contact them in order to get a credit reference.
- If you would prefer to be approved using your credit card, call (402) 316-5460.
- Please be sure to apply for bidding at least a day in advance of the sale-every effort will be made to process your application in a timely manner.

DVAuction will contact you once you have been approved to bid. We do not provide buyer numbers until you have purchased a lot in the sale, and that number is only usable for that auction. After the sale contact the sale owner or manager to make arrangements for payment and delivery of your online purchases.

Please Note: High speed Internet access (DSL, T-1, or Broadband) is required to be able to bid successfully during the sale. If you have any questions, please contact DVAuction at (402) 316-5460 or email support@dvauction.com.

Proxy Bidding: If you can't access a computer during the sale, you can now place a "proxy bid" through DVAuction. Simply follow the instructions listed above, and as the sale date nears there will be a "Proxy Bidding" link under the sale listing on the main page of DVAuction. You can then place the maximum amount that you'd like to bid, and our system will represent your bid just as if you were there.

RED ANGUS GUIDE TO EPDS

RedAngus.org

ProS..... Profitability and Sustainability is an all-purpose index that predicts average economic differences in all segments in the beef supply chain. This index is a combination of the breeding objectives modeled in the HerdBuilder and GridMaster selection indexes. In this index, replacement heifers are retained from within the herd and all remaining progeny are fed out to slaughter and sold on a quality-based grid. Traits included in this index include calving ease, growth, HPG, STAY, Mature Weight, Dry Matter Intake and carcass traits. The resulting index is expressed in dollars per head born (Index/High Value).

HB..... HerdBuilder is a maternal selection index that predicts the economic differences of animals for traits that are important from conception through weaning. Expressed as dollars per head born, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained and all remaining progeny are marketed at weaning. Traits included in the HB index include Calving Ease Direct, Calving Ease Maternal, Weaning Weight, Milk, Mature Weight, Heifer Pregnancy and Stayability (Index/High Value).

GM..... GridMaster is a selection index that predicts the average economic difference of non-replacement calves through the post-weaning phase of production. GM places selection pressure on growth, feedyard performance and carcass traits. Expressed as dollars per head born, GM is calculated based on the scenario that progeny are fed out to slaughter and marketed on a quality-based carcass grid. Traits included in GM include Average Daily Gain, Carcass Weight, Dry Matter Intake, Marbling, Back Fat and Rib Eye Area (Index/High Value).

CED..... Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. (Percent/High Value)

BW..... Birth Weight predicts differences in actual birth weight of progeny. (Pounds/Low Value)

WW..... Weaning Weight predicts differences in 205-day weaning weight. (Pounds/High Value)

YW..... Yearling Weight predicts differences in 365-day yearling weight. (Pounds/High Value)

ADG..... Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. (Pounds/High Value)

DMI..... Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the post-weaning period. (Pounds/Low Value)

MILK..... Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. (Pounds/High Value)

ME..... Maintenance Energy predicts the difference in maintenance energy requirements. (Mcal per Month/Low Value)

HPG..... Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding. (Percent/High Value)

CEM..... Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. (Percent/High Value)

STAY..... Stayability predicts differences in the ability of an animals' retained daughters to remain productive in the herd – calve every year – through 6 years of age. (Percent/High Value)

MARB..... Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. (Marbling Score Units/High Value)

YG..... Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. (Yield Grade Units/Low Value)

CW..... Carcass Weight predicts differences in actual hot carcass weight. (Pounds/High Value)

REA..... Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib. (Square Inches/High Value)

FAT..... Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs. (Inches/Low Value)

- 138 has had a herd bull, alert look about him since day he was born.
- A Spartacus son that is long, wide topped, shows high growth and carcass qualities, and to top it off a friendly disposition. He is our #1 WW bull.
- Dam is attractive, long sided, and stayed on track again this year as one of the first AI cows to calve.

Simmental Guide to EPDs

Courtesy of the America Simmental Association. For more information on EPDs, visit simmental.org.

CE Calving Ease – predicts the ease with which a bull's calves are born to first-calf heifers or mature cows. Larger number indicates higher percentage of unassisted births for calves sired by this bull.

BW..... Birth Weight – predicts the difference in average birth weight of a bull's progeny compared to other bulls.

WW Weaning Weight – predicts the difference in average 205-day weight of a bull's progeny.

YW..... Yearling Weight – predicts the difference in average 365-day weight of a bull's progeny compared to other bulls.

MCE Maternal Calving Ease – The ease with which a sire's daughters calve as first-calf heifers or mature cows. Larger number indicates higher percentage of unassisted births for calves born out of this sire's daughters.

Milk Milk – predicts the milking ability of a bull's daughter. A positive value indicates above average milking ability.

MWW Maternal Weaning Weight – predicts the weaning weight of a bull's daughter's calves in pounds. A positive value indicates higher-than-average weaning weights.

CW..... Carcass Weight – predicts the difference in average hot carcass weight. A positive number indicates heavier-than-average carcass weights.

REA Ribeye Area – predicts the average difference in ribeye area between the 12th and 13th rib of an animal's progeny. Express in sq. inches.

MARB .. Marbling Score – A subjective evaluation of the amount and distribution of intramuscular fat (IMF) measured between the 12th and 13th rib. A positive value indicates higher-than-average marbling.

BF or FAT Backfat – predicts the average differences between an animal's progeny in external fat thickness at the 12th and 13th rib. Express in inches at a given age endpoint.

YG Yield Grade – predicts the average differences in cutability and is expressed as a deviation. A negative or lower value is desirable just as a lower Yield Grade is desirable.

STAY Stayability – predicts the probability that a sire's daughters entering the herd will stay in production through 6 years of age. A higher value indicates greater stayability.

API All-Purpose Index – Evaluates sires for use on the entire cow herd with a portion of their daughters required to maintain herd size and the remaining progeny put on feed.

TI Terminal Index – Evaluates sires for use on mature Angus cows with all offspring put on feed. Maternal traits are not considered in this index.

Udder Scoring – Suspension & Teat Size

Red Angus' two-score system allows for the separate evaluation of udder suspension and teat size.

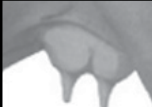

Teat size scores are subjective assessments of teat length and circumference and range from 9 (very small) to 1 (very large). Use the following guidelines when collecting udder score data:

- Udder scores should be taken within 24 hours after calving.
- Use a cow's "weakest" quarter to score teat size and udder suspension.
- Age of the female should not be factored into her scores.
- It's best if the same person scores all females in each management group.

Udder Suspension

| Score | Description | Example |
|-------|-------------------------------|---|
| 9 | Very tight. |  |
| 7 | Tight. |  |
| 5 | Intermediate/moderate. |  |
| 3 | Pendulous. |  |
| 1 | Very pendulous, broken floor. |  |

Teat Size

| Score | Description | Example |
|-------|-----------------------------|---|
| 9 | Very small. |  |
| 7 | Small. |  |
| 5 | Intermediate/moderate. |  |
| 3 | Large. |  |
| 1 | Very large, balloon shaped. |  |

A-BAG-A-BULL

If you purchase a bull from us, we will provide you with credit equal to the value of one bag of Feeder Calf Certification Program or Allied Access tags for each bull you purchase. To redeem your credit, bring your receipt for the tags to next year's sale and we will apply it to your bull purchase.

The FCCP provides age, source and genetic verification for calves sired by registered Red Angus bulls. Cattle enrolled in the FCCP are accepted into the exclusive Choice+ and G.O. Red grids. The FCCP 'yellow tags' are recognized by buyers nationwide and return a premium for Red Angus calves enrolled in the program.

The Allied Access program provides age and source verification for commercial cattlemen whose bull battery does not exclusively contain registered Red Angus bulls. Whether you are utilizing multiple sire breeds or halfblood bulls, enrolling in Allied Access demonstrates to buyers that you are taking an extra step in marketing your calves and adding value throughout the production chain.

To enroll in the FCCP or Allied Access, contact the Red Angus marketing department. Enrollment is simple and free of charge.

PROFIT. REPEAT.

Generate repeated profits with the industry's most-favored female.

Independent research from a decade of data collection showed Red Angus-sired heifers commanded \$66/head more than females of other breed types. That's nearly \$5,300 on a single load of replacement heifers to boost profits on your operation.

Visit RedAngus.org for details on the industry's most-favored female.

RED ANGUS

RANCH TESTED. RANCHER TRUSTED.

30 Head Red Angus-Cross Heifers

Wayne and Kaye Schulz, Streeter, ND 701-269-2045

Red Angus-Cross heifers from the heart of their replacement pen. Wayne has been using AI and top maternal Red Angus bulls for over 30 years. This will be a real nice set of replacement heifers weighing about 850. In addition, they have been on a full vaccination and mineral program. They have been poured, Bangs vaccinated and pelvic measured checked for open and breeding soundness with a PregGuard shot. Any questions, contact Wayne at 701-269-2045.

40 Head Commercial Red Angus/Simmental Commercial Heifers

Karen Mutschler or Jeremy Hoff 605-281-0055 or 605-281-0257

These heifers are February/March calves. They will be weighing around 900-950 lbs. They have had all their calthood shots:

Birth – Alpha 7, Vit EAD, Clostridium Type A and Inforce 3

Pasture Turnout (June 1): Pyramid 5/Presponse, Pinkeye Shield XT4, Inforce 3 and LongRange

Prewearing (Aug. 15): Pyramid 5/Presponse, Ultraback 7/Somubac and Mycroplasma

Weaning (Sept. 15): Pyramid 5/Presponse, Ultraback 7/Somubac, Inforce 3 and poured with Ivomec

On Dec. 1, they were Bangs vaccinated, pelvic measured and checked open and breedable. They received Bovi Shield GodI FP5/VL5, Clostridium Type A shots with EID Bangs tags by Holly Roe-Johnson, DVM, out of the Hosmer Veterinary Clinic.

They have never had creep feed and have been on a 52 mCal balanced ration, RIO MAX tubs, garlic salt blocks and received Safeguard dewormer in November.

Karen has been using AI and top Simmental and Red Angus bulls for 20+ years.

**Thank you for your confidence in our programs and your support at the sale.
If we can be of any assistance with your new purchases, please don't hesitate to call!**
