

INFANT PROGRAM

- **Infant Child Care** (ages 6 weeks to 1 year)

Infants try to figure out how the exciting world around them works. Our infant curriculum is designed to enhance self-awareness and sensory experiences as well as enrich observations and curiosities about the environment. Infants will begin to understand how things work and what will come next, as they start to construct their own informal knowledge through exploration and discovery. Acquisition of fundamental concepts, strategies, and skills through everyday activities and learning experiences prepare infants for our Toddler Program.
