

OUR PROGRAMS

Now is the time to invest in your child's education. Some of the programs we offer include:

- Infant Child Care (ages 6 weeks to 1 year)
- School for Toddlers (ages 1 to 2 years)
- Preschool Program (ages 2 to 4 years)
- Before and After School Programs (ages 5 to 12 years)
- Summer Camp Programs (ages 5 to 12 years)

We believe that a diverse curriculum that strengthens both your child's cognitive abilities as well as social and life skills is the key to successful development. That's why we provide our students with a well-rounded experience that embraces and transcends the more traditional scholastic elements. Your child will be introduced to classes that teach culinary education, coding and robotics, character development, and communication among other things.

Our use of evidence-based scientific studies guides our approach to learning at Self Preparatory Academy, which is why we break up each preschool child's day into a 30-minute classroom rotation. This has been shown to enhance attention spans and enrich the learning experience by catering to each child's natural attention span at that age. Additionally, through this, we are able to provide students with access to a wide range of subjects and enrichment programs.
