

To adequately build an energy efficient home, foundation insulation is an integral part of the whole design. The one problem that arises is how to adequately insulate the foundation section exposed above grade to where the siding begins.

XPS foam on the exterior is a great choice to use as insulation but left unprotected it is susceptible to damage from yard maintenance, chewing critters and other accidental mishaps that can and always occur.

Tech Breaker solves that issue with an all-in-one labor saving "Ground Breaker" system that combines moisture resistant XPS Foam with a tough protective membrane layer that keeps your home warm while keeping it looking clean and finished on the exterior.

More Tech Breaker features:

- ▶ **Insulates and protects your foundation base**
- ▶ **Durable rubberized covering resists damage from projectiles due to lawn mowing etc.**

- ▶ **Washable /Cleanable**
- ▶ **Smooth grey matte finish gives concrete like appearance**
- ▶ **2" flap tucks underneath siding for a clean appearance**
- ▶ **Easy installation with mechanical fasteners (follow manufacturer instructions)**
- ▶ **No patch kit to buy!**
- ▶ **6" end flap goes around inside and outside corners**
- ▶ **No corners to buy and patch**
- ▶ **Lighter weight than brittle aggregate cement based products**
- ▶ **Easier handling**
