TecWRAP is durable rubberized foundation protection with a foam backing that can be applied directly to the exposed foundation of any home, new or existing. TecWRAP can be applied as is (insulation value R = 1) or combined with XPS/EPS foam for additional insulation value. TecWRAP solves the problem of adequately covering the foundation section exposed above grade to where the siding begins.

TecWRAP acts as an air barrier (patent pending) to help energy seal your foundation. TecWRAP is packaged in lightweight 25" rolls--easy to handle and install.
