Eagle Seed Description List

<u>Product</u>	<u>Wt.</u> <u>(lbs.)</u>	<u>Coverage</u> <u>(acres)</u>	<u>Life</u> <u>Cycle</u>	<u>Consists of</u>
<u>Cool Season Grains</u>				
Buck Monster™ Forage Wheat	50	.5	Annual	Consists of Forage Wheat. Buckmonster Forage Wheat is an incredibly winter hardy, awnless wheat with monster tillers. It handles the cold better than oats and is preferred over cereal rye.
Cereal Rye	50	.5	Annual	Cereal Rye is a cool season annual grain. Can be seeded later in the fall for wildlife cover crop or livestock. Helps protect the soil.
Chicory	50	10	Perennial	High in protein and energy for deer and other wildlife.
ES Black Oats (Eagle Oats)	50	.5	Annual	Consists of Oats. with a high relative feed value and nutrient density, Eagle Oats provide excellent forage yield and palatability for deer, horses and cattle. The larger biomass of the leaf blade, tillers, and root structure makes for superior weed and nematode suppression. They deliver excellent C:N ratio, efficient mineralization, and building of soil organic matter. Eagle Oats produce earlier cereal: 3 weeks earlier than rye or wheat
Harper's Blend™	50	.75 to 1	Annual	Consists of Buck Monster Forage Wheat, Crimson & Balansa Clover. Harper's Blend is a power duo of Buck Monster® Forage wheat and high-tonnage Crimson and Balansa clover. Designed by Dr. Craig Harper, renowned wildlife biologist and economist, this blend is budget-friendly, easy to establish and effective. Great over-the-top of an existing plot or as a stand-alone planting.
Roundup Ready Alfalfa	50	2.5-3	Perennial	Lives up to 8 years. Great for hay or grazing.
<u>Brassicas</u>				
Austrian Winter Peas	50	1	Annual	Low growing viney legume. Helps fix the nitrogen per acre, per year.
Daikon Radish	50	5	Annual	They help with the soil, hard pan. The deer will eat the green top and radish itself. They germinate and thrive in most soils and great for no-till.
Purple Top Turnips	50	5	Annual	A brassicas plant that deer love to consume. The turnip will grow exposed where the deer will have access to the entire plant. They are high yielding and well adapted with very little tillage.
Sugar Beets	50	5	Annual	A high source of sugar for wildlife to help with the body heat in the winter.
Trophy/Forage Rape	50	5	Annual	A cool season annual planting Brassicas. Trophy/Forage Rape is heat, cold and drought tolerant. Great for all wildlife and livestock grazing.
Winter Garden™	6	1	Annual	Consists of Kale, Collards, Turnips, and Radishes. Winter Garden is a highly attractive, highly palatable premium brassica blend that's great for late season wildlife.
<u>Cool Season Mixes</u>				
Broadside® Fall Blend (Large)	50	.5	Annual	Consists of Winter Peas, Radishes, Buck Monster Wheat, Turnips, and Rape. Broadside is a highly productive "time-release" fall food delivering excellent palatability from early fall to spring. Soon after planting, tender winter peas attract deer to your plots. Next, forage radishes energize your deer during pre-rut. Then, Buck Monster forage wheat provides additional protein to keep the deer through rut. Finally, forage turnips and rape seeds keep your deer growing in the late season.
Broadside® Fall Blend (Small)	25	.25	Annual	Consists of Winter Peas, Radishes, Buck Monster Wheat, Turnips, and Rape. Broadside is a highly productive "time-release" fall food delivering excellent palatability from early fall to spring. Soon after planting, tender winter peas attract deer to your plots. Next, forage radishes energize your deer during pre-rut. Then, Buck Monster forage wheat provides additional protein to keep the deer through rut. Finally, forage turnips and rape seeds keep your deer growing in the late season.

ES Buffalo Fall Mix®	50	.25 to .75	Annual	Consists of Clover, Rye, Radishes, Brassicas, Buckwheat, Buck Monster Wheat, and Soybeans. The Buffalo Fall Mix's quick growing clover returns nitrogen to your soil, while rye, radishes and brassicas produce an extensive root system, cutting hardpans and reducing soil compaction. Buckwheat attracts deer and pulls nutrients up from the soil, while Buck Monster® Wheat tillers rapidly to feed wildlife from fall to early summer. This cold tolerant mixture is the fall part of the Buffalo Food Plot System™.
NWTF Harvest Gold™	50	.5	Annual	Radishes, Turnips, Wheat, Oats, Soybean, Rye, Rape
Clovers				
Buffalo Clover	9	1	Annual / Perennial	Carefully crafted blend of annual and perennial clovers to keep your deer happy this year and for years to come. It features large Berseems, Balansa and high tonnage Ladino.
Clover Keeper®	12	1	Perennial	Consists of red and white clover blend. Clover Keeper is a highly preferred, high tonnage, easy-to-grow, perennial clover blend, composed of the top yielding red and white clovers from multiple state university grazing and tonnage trials. These premium clovers accommodate a wide range of soil types, temperature ranges, and soil conditions.
Top Five®	12	1	Annual	Consists of 5 different pre-inoculated clovers maturing at different dates for year-round coverage. The TOP FIVE® blend contains 5 clovers designed to prolong your growing season with different maturities, flowering times, and tolerances to soil and weather conditions. The Balansa clover in this blend can reach up to 3 feet in height and withstand soil from 4.5 to 8.5 pH. These medium and large leafed clovers are highly palatable and accommodate various soil types.
Clover Mixes				
ESCO Fall Blend®	30	1	Annual	Consists of Brassicas, Forage Winter Pea, and Clover. ESCO Fall Blend is quick and easy to grow; establishing season-long, highly palatable, cruciferous plants and leafy legumes. The forage starts growing quickly to keep your deer returning to your plots and nitrogen returning to your soil.
ES Green Keeper™	12	1	Perennial	Consists of red clover and white clovers, Alfalfa. Green Keeper™ is a highly palatable blend of premium perennials: red and white clovers with a highly digestible alfalfa.
ES Hunt Master	12	1	Perennial	Consists of Chicory, Red Clover, and White Clover. Hunt Master features the tastiest, large leafed, foliage chicory and premium red and white clovers. The soft, tender leaves are easy to digest, very attractive and drought tolerant. Add it to a bag of Buck Monster® Forage wheat for greater coverage and to extend the grazing season from early fall to late spring.
Smorgasbord®	50	1	Annual	Consists of Radishes, Rape, Kale, Collards, Rye, Wheat, Oats, and clover. Smorgasbord truly lives up to its name. Accommodating a wide range of soil types, temperatures and soil conditions, this high-protein and high-tonnage blend provides maximum food for wildlife. Clover seeds are pre-inoculated.
