

# Bluebeam Revu® PDF Proficiency Level I Class Dates

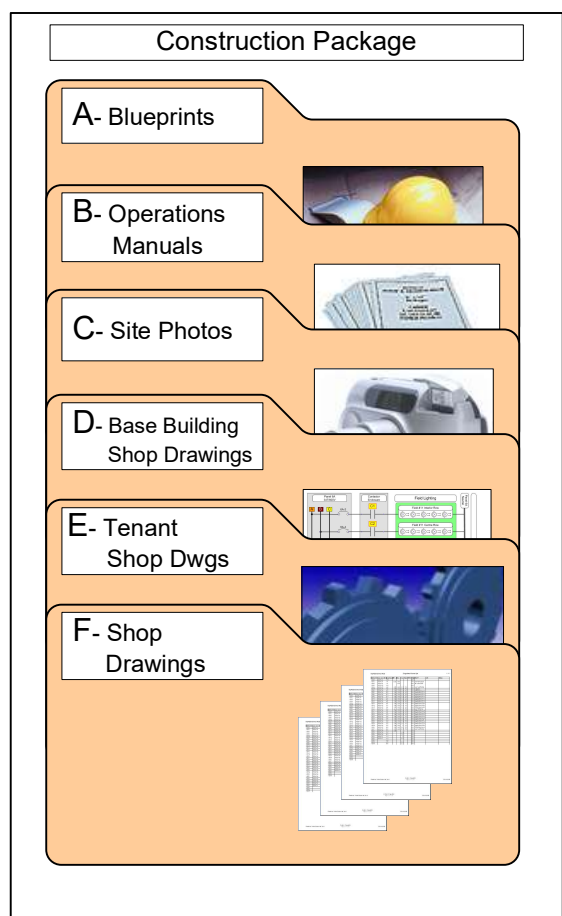

## What is Bluebeam?

Bluebeam Revu, a comprehensive PDF management & collaboration software tool that is used by electrical estimators, journeymen, technologists, project managers & engineers throughout the lifecycle of a building project. Contracting and engineering firms use Bluebeam because it **saves time, boosts efficiency and allows team members to simultaneously work together.**

Essentially, Bluebeam links everyone through all the documents at the same time, as if they were sitting in one room

## Why take OpenStar's Bluebeam training?

Our training team has several decades experience in the construction industry. We use Bluebeam in our own project estimating and management assignments. All our lessons are proven through actual field use. Our Bluebeam Revu training brings everyone on your team onto the documents together. You solve project problems through the drawings. All the content is online all the time. This is a 12 hour 3 day course.

### Taught by a team with decades of electrical experience

Master Electrician, Electrical Technologist, IT Technologist  
Certified Bluebeam instruction

### Applicable drawing lessons in Bluebeam compliant with:

**Fire Alarm, as per ULC S524 & S527** **NEW!**  
CEC, as per 2021 25<sup>th</sup> Edition

### Compare documents displayed simultaneously

Electrical Vs Mechanical      Scaling confirmation with Google Earth  
Issued For Tender (IFT) Vs Issued For Construction (IFC) Drawings

### Extensive Electrical toolboxes :

Lighting Fixtures      Distribution      **Building Automation**  
**Fire Alarm**      Security & Data

## ● Success defined:

Previous OpenStar Client impressions:

Austin Nakoa, President, NAKOA Companies, Inc.

*I'm extremely happy with the training efforts...I've also recommended you to a couple of my fellow contractors...*

Jeff Dzik, Lead Electrical Designer, Asahi Kasei Bioprocess America, Inc.

*I must hand it to you, that is the best course material I have ever seen, top-notch.  
I forwarded and recommended that course to the rest of my Team*

Gary Dimateo, IBEW E&I instructor

*He touched on a wide array of topics and turned them into simple tasks. .... This class will help me both in the field working as a General foreman for an I&C contractor and in the classroom where I teach the Instrumentation classes. I strongly recommend taking this class to help you make your job easier and organized which will mean a more efficient use of time at work..*
